Gas metering:

Each well will have an individual EFM regularly calibrated to API, NMOCD, and BLM specifications located near the separation equipment. The gas production from the wells listed above will be measured, comingled, and sold off lease using the well test method.

Process and Flow Descriptions:

An Enterprise common gas sales meter (68681) is located in Sec.9, T20S, R29E. This meter is calibrated on a regular basis per API, NMOCD, and BLM specifications.

The commingling of production is in the interest of conservation and waste and will result in the most effective economic means of producing the reserves in place from the affected wells and will not result in reduced royalty or improper measurement of production. The proposed commingling will reduce operating expenses as well as reduce the surface facility footprint and overall emissions.

Mewbourne Oil Company understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. Additionally, Mewbourne Oil Company will submit within 30 days, an application for right-of-way approval to the BLM and NMOCD section in your office, if we have not already done so.

Re: Application for Surface Commingling - Gas
Eddy County, New Mexico

Ladies and Gentlemen:

Mewbourne Oil Company ("Mewbourne") has filed an application with the New Mexico Oil Conservation Division ("Division") seeking authorization to surface commingle gas production from the wells listed and described on the attached Well Listing, all located in Eddy County, New Mexico. The gas production from these wells will flow to a common Browning Master Meter (MM #68681-01), located in Section 9, Township 20 South, Range 29 East, Eddy County, New Mexico. This commingling application does not include the oil produced for the listed wells. If you object to this application, you must notify the Division, in writing, no later than 20 days from the date of this letter (the Division's address is 1220 South St. Francis Drive, Santa Fe, New Mexico 87505). Failure to object will preclude you from contesting this matter at a later date.

Should you have any questions regarding the above, please email Cade Carter at ccarter@mewbourne.com or call at (575) 393-5905.

Very truly yours,

MEWBOURNE OIL COMPANY

Lee M. Scarborough
Landman

Re: Application for Surface Commingling - Gas
Eddy County, New Mexico

Ladies and Gentlemen:

Mewbourne Oil Company ("Mewbourne") has filed an application with the New Mexico Oil Conservation Division ("Division") seeking authorization to surface commingle gas production from the wells listed and described on the attached Well Listing, all located in Eddy County, New Mexico. The gas production from these wells will flow to a common Browning Master Meter (MM #68681-01), located in Section 9, Township 20 South, Range 29 East, Eddy County, New Mexico. This commingling application does not include the oil produced for the listed wells. If you object to this application, you must notify the Division, in writing, no later than 20 days from the date of this letter (the Division's address is 1220 South St. Francis Drive, Santa Fe, New Mexico 87505). Failure to object will preclude you from contesting this matter at a later date.

Should you have any questions regarding the above, please email Cade Carter at ccarter@mewbourne.com or call at (575) 393-5905.

Very truly yours,

MEWBOURNE OIL COMPANY

Lee M. Scarborough
Landman
