Re: Amendment to Administrative Order PLC-436: Application of Breithurn Operating LP for administrative approval to surface commingle oil and gas production from the Encore M 21 Fee Lease located in Section 21, Township 22 South, Range 37 East, NMPM, Lea County, New Mexico and the New Mexico State Lease B-934 in Township 22 South, Range 37 East, NMPM, Lea County, New Mexico.

Dear Mr. McMillan:

Breithurn Operating LP (OGRID 370080) has obtained a permit to drill the Encore M 21 Fee Well No. 001 (API 30-025-43444), (UL L), Section 21, T-22S, R-37E. In accordance with NMAC 19.15.12.9(B) which sets forth the requirement for lease segregation of oil and gas production, and NMAC 19.15.12.7(C) which defines "lease" or "leases", Breithurn seeks approval to commingle oil and gas production from this and all future wells to be drilled on the Encore M 21 Fee Lease with the oil and gas production from the wells on the New Mexico State Lease B-934 currently surface commingled as approved by Administrative Order PLC 436, issued 12/14/2016. The pools to be commingled from the Encore M 21 Fee Lease are those same pools currently commingled per PLC-436: Blinbury (06660), Drinkard (19190), Tubb (60240), Wantz Abo (62700) and Wildcat Devonian(WC-025-G04 S2237201).

Exhibit 1 lists the New Mexico State Lease B-934 wells currently surface commingled.

Exhibit 2 is the completed Application for Surface Commingling (Diverse Ownership) (C-107B) in accordance with NMAC 19.15.12.10.

Exhibit 3 is a map with New Mexico State Lease B-934 boundaries and facility locations, and a map showing the location of the Encore M 21 Fee Lease and its proximity to the New Mexico State Lease B-934. There are 3 tank batteries that collect and sell production from wells near these facilities.

Production from each well, except the Encore M State No. 019, is brought into a production header at each facility, and the individual well production allocation is determined monthly using the test separators at each facility. The production from the Encore M State No. 019 (WC-Devonian) is metered separately before flowing to the facility. Production from the Encore M 21 Fee No. 001 well, and all future wells to be drilled on the Fee Lease, will be separately metered prior to flowing to the battery.

Encore M State Battery #1 (FKA Central Tank Battery) accepts and sells production from the Encore M State No. 001.

Satellite # 1 accepts and sells production from the; Encore M State No 002, 003, 004, 005, 006, 007, 008, 009, and 010 wells. Once drilled, Encore M State No. 013 will flow into the Satellite # 1. Gas is sold from Targa # 967.

Encore M State Battery # 2 (FKA Satellite #2) currently accepts and sells production from the Encore M State No. 012, 014, 015, 016, 018 and 019. Gas is sold from Targa # 992. Once drilled, the Encore M State No. 011 and No. 017 will flow into the Encore M State Battery #2. Production from the Encore M 21 Fee No. 001, and all future well drilled on the Fee Lease, after being separately metered, will flow to the Encore M State Battery #2.

Exhibit 4 includes C-102s and Corresponding 2016 Production Reports for the Encore M State wells.

Exhibit 5 includes C-102s for the Encore M 21 Fee No. 001 (API 30-025-43444).

Exhibit 6 provides Proof of Notification to interest owners of the Encore M 21 Fee Lease, interest owners of the New Mexico State Lease B-934, and a notarized affidavit for publication of the legal notice for this application.

Because this surface commingle requires the flow of oil and gas from a fee lease onto a state lease, Breitburn is simultaneously working with the New Mexico State Land Office to obtain the required business lease and ROW for the flow lines, roads and electric lines.

This surface lease commingle will be of economical and operational benefit by reducing operating cost, streamlining the overall operational logistics of the leases. The surface commingle will prevent waste, promote conservation and protect correlative rights by utilizing central collection, metering and sales points for the various wells.

This application is respectfully submitted.

Lea County, New Mexico

Ladies and Gentlemen:

Attached is a Division Form C-107B that is being filed with the New Mexico Oil Conservation Division ("Division") to request approval to surface commingle oil and gas production from the Blinebry Oil and Gas (Oil), Tubb Oil and Gas (Oil), Drinkard and Wantz;Abo Pools within the Encore M 21 Fee Lease, as described above, with oil and gas production from the same pools in the New Mexico State Lease, as described above.

Oil and gas production from wells on the Encore M 21 Fee Lease will be separately measured in order to properly allocate production values to all interest owners.

No action is required on your part. However, any objection to the proposed surface commingling must be filed in writing at the Division's Santa Fe Office within 20 days from the date this notice was sent to you. If no objection is received within twenty days after the filing of this application and proof of notice with the Division, the application may be approved.

If you have any questions, please contact Ms. Shelly Doescher, Agent for Breitburn Operating LP, at (505) 320-5682, or Ms. Charlotte Nash at (713) 632-8730.

Ladies and Gentlemen:

Attached is a Division Form C-107A that is being filed with the New Mexico Oil Conservation Division ("Division") to request approval to downhole commingle the Blinbry Oil and Gas (Oil), Tubb Oil and Gas (Oil), Drinkard and Wantz;Abo Pools within the Encore M 21 Fee Well No. 001, as described above.
