to coincide w/existing incident
and Admin. Order. Old Fac.# was not
on record. AB

Describe Cause of Problem and Remedial Action Taken.*

Loss of pressure on vessel forced water to dump into frac tank. Frac tank ran over spilling contaminants onto location and into pasture.

Describe Area Affected and Cleanup Action Taken.*

Vacuum truck picked up standing liquid. Pads will be used to absorb isolated puddles. Water and soap will be used to wash contaminants to low spot to be picked up by vacuum truck. Micro blaze will be used over contaminated area. Area will be monitored to determine if further action will be necessary.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
