Describe Cause of Problem and Remedial Action Taken.
Produced water tank was struck by lightning resulting in a produced water release. All the wells were shut in to prevent further release. Repairs are planned.

Describe Area Affected and Cleanup Action Taken.
Fiberglass water tank was struck by lightning during storm releasing 140 BBLS of pw into the surrounding earthen bermed containment. 0 BBLS pw was recovered. The released fluid flowed in a southwestern direction leaving both containment and the pad mixing with rainwater. The approximate area affected on pad is 30ft by 75ft. The total affected area off pad is 75 yards by 30 yards on the southwest side of pad. An environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
