**Re: 2<sup>nd</sup> Amendment - Escrito Trunk #1 Gathering System PLC-378**  
San Juan County, New Mexico

Dear Mr. Catanach, Ms. Barr and Mr. Dunn,

Encana Oil & Gas (USA) Inc. (Encana) requests Administrative Approval to tie-in additional wells to the Escrito Trunk #1 Gathering System (EGS), New Mexico Oil Conservation Division (NMOCD) identification number PLC-378. Encana requests approval to commingle natural gas for the leases and wells listed on Attachment No. 1 which reflects the thirty-three (33) wells currently approved for Pool and Lease Commingling under PLC-378; as well as the fifty-nine (59) additional wells Encana requests approval to tie into the EGS. Moreover, Encana requests approval to claim beneficial use at the gas lift injection meter on the well pad, which is depicted for each well pad, on the gas lift schematics presented in Attachment No. 6. Note that several of the well names have changed for a handful of wells that were previously approved for connection to the EGS. This is due to the formation of Federal Units, whether currently approved or in the stages of forming. Encana will be the operator of the Federal Units.

Encana is the operator of all ninety-two (92) wells proposed for interconnection to the EGS. The addition of the fifty-nine (59) wells requires surface commingling of gas, and in some cases off-lease measurement and sale of produced natural gas, as well as off-lease transportation and sale of oil and condensate. There will not be any commingling of oil or condensate in the pipeline. As previously stated in the initial application, the EGS will tie-in into Enterprise Field Services LLC (Enterprise) pipeline in Section 7, Township 24 North, Range 9 West, which will be the point of custody transfer and sales point, herein referred to as the Central Delivery Point (CDP) as well as the Point of Royalty Measurement (PRM). A schematic of the Enterprise interconnection was provided in the initial application. Should you require another copy please contact the undersigned. Also, please note that it is Encana's intention that the EGS will only service natural gas producing from the Mancos formation and furthermore, will only service Encana operated wells.

As you are most likely aware, in order to optimally develop horizontal wells, Encana has proceeded with permitting various well pads in the section adjacent to the Project Area (PA) and/or developed acreage. Therefore, in some instances, the well pad surface hole location (SHL) is located off-lease. In these instances, Off-Lease Measurement of natural gas will occur at the well head by a well allocation meter and again at the pipeline tie-in to EGS CDP. Furthermore, Encana intends to install a gas lift compressor on each well as depicted and described in Attachment No 5. Please note, Encana intends to submit to the Bureau of Land Management (BLM) a sundry to formally request approval to install gas lifts on these wells, which, once approved, will be forwarded on to the New Mexico

Encana Oil & Gas (USA) Inc., acting by and through its authorized agent,  
Encana Services Company Ltd.

370 17<sup>th</sup> Street, Suite 1700, Denver Colorado 80202 720.876.5331 (O) 303.521.2835 holly.hill@encana.com

Conservation Division (NMOCD) for their approval. Again, there will not be any commingling of oil or condensate with naturally produced gas in the pipeline.

If applicable, Off-Lease Measurement, Transportation and Sale of produced oil and condensate will occur at the surface location for the affected well where Encana will install the necessary number of 400-barrel oil storage tanks and water tanks. Generally, produced water will be measured using tank gauges and produced oil will be measured using a strapping table measurement by the associated vendors. Run tickets will be filled out onsite for each load of oil, which will show the tank gauge readings, oil gravity, temperature and BS&W content. Each valve on the tanks will have seals. Records will be kept that will show when seals are installed and removed. The tank seal information is also recorded on the run tickets, which will accompany the transportation of the oil.

In summary, Encana is requesting administrative approval to interconnect an additional fifty-nine (59) wells to the EGS, which would include a total of one hundred and ninety-two (92) wells tying into the EGS.

Enclosed please find the following:

**A. Administrative Application Checklist for Pool/Lease Commingling dated January 5, 2017.**

**B. State of New Mexico Oil Conservation Division Form C-107-B, Application for Pool/Lease Commingling dated January 5, 2017. Attached to and made part of the Application for Pool/Lease Commingling please find the following:**

**Attachment No. 1:** Presents the following information:

- |                                            |                                                                          |
|--------------------------------------------|--------------------------------------------------------------------------|
| 1) Wells                                   | 5) Projected gas rate for leases                                         |
| 2) Leases                                  | 6) Projected gas percentage in the EGS for the wells                     |
| 3) Pool information                        | 7) Projected initial gas heating value through ~1 <sup>st</sup> 6 months |
| 4) Projected gas rate for individual wells | 8) Projected gas heating value after ~1 <sup>st</sup> 6 months           |

A projected decline rate for each well is also addressed in Attachment No. 1 in the Explanation Legend. Note that some of the well names have changed for a handful of wells that were previously approved for connection to the EGS. This is due to the formation of Federal Units, whether currently approved or in the stages of forming, that Encana will operate.

**Attachment No. 2a:** Presents a map of the EGS pipeline, depicting thirty-six (36) well pads (which represent all 125 wells) that will tie into the EGS which will then tie into EGS's CDP in Section 7, Township 24 North, Range 9 West. The EGS pipeline is approximately 18,869.3-feet in length (3.57 miles), stretching across Bureau of Land Management (BLM), Indian Allotted Surface and State of New Mexico surface. Encana applied for the Escrito Trunk #1 (BLM serial number 129531, SLO R-33346) Right-of-Ways with the BLM and State Land Office (SLO).

Each well will be equipped with a continuous recording gas allocation meter (or some form of approved alternative measurement) operated and maintained by Encana. Prior to converting any gas measurement from a conventional allocation meter to an alternative measurement method, Encana will seek formal approvals. The allocation procedures, including examples of how the allocation method would be applied for each well are presented on **Attachment No. 5.**

Moreover, Condensate and oil will be separated, stored and sold at the well head SHL, which in some instances, may be off-lease. Depending on their availability Encana will enlist the services of High Tech Tools, LLC (mailing address: PO Box 1244 Aztec, NM 87410; phone number: 505-334-2266) or Three Rivers Trucking, Inc. (mailing address: PO Box 2728, Farmington, NM 87499; phone number: 505-632-5300) to transport produced water to Basin Disposal Inc. (address: 300 Legion Road, Aztec, NM 87410; phone number: 505-334-3013). Produced water will be generally measured using tank gauges.

Encana will enlist Western Refining, to transport and purchase crude oil from the SHL to the Gallup Refinery (location: I-40, Exit 39, Jamestown, NM 87347; Route 3, Box 7, Gallup, NM 87301; phone number: 505-722-3833). Western Refining will provide a strapping table measurement for each oil tank at the facility which will be used to determine the exact volume in each tank. Run tickets will be filled out for each load of oil, onsite, which will show the tank gauge readings, oil gravity, temperature and BS&W content. Each valve on the tanks will have seals. Records will be kept and logged into an internal database that will show when seals are installed and removed. The tank seal information is also recorded on the tickets, which will accompany the transportation of the oil.

**Attachment No. 2b:** Presents the well dedication acreage for the fifty-nine (59) wells Encana is proposing to interconnect to the EGS as depicted on either the NMOCD Form C-102s, or a plat depicting intended wellbore PAs.

**Attachment No. 2c:** Presents a plat depicting contemplated individual well pad pipeline connection paths for all thirty-six (36) well pads connecting to the EGS. In line with the BLM's Instructional Memorandum dated July 3, 2013, Attachment No. 2c contemplates, as an alternative, individual well pad connections versus one (1) gathering system, namely the Escrito Trunk #1 Gathering System (EGS). Also included, is a breakdown of pipeline length and pig launcher and receiver disturbance for each of the twenty-seven (27) well pads and projected costs for such an undertaking. According to our calculations individual well pad pipeline connections for the twenty-seven (27) well pads would total approximately 130 miles in length; and, including a 40-foot width for the pipeline right-of-way the acreage disturbance would be approximately 631 acres. Additionally, Encana estimates that a pig launcher and receiver would be required for the twenty-seven (27) individual well pad pipeline connections into EGS's pipeline which would also cause more surface disturbance. Encana estimates that pig launchers and receivers could potentially be 10-feet by 20-feet for each of the twenty-seven (27) individual well pad pipeline connections. Encana estimates that such an undertaking would cost approximately \$29,550,875. Again, the breakdown included in Attachment No. 2c will provide more detail as to how Encana arrived at these conclusions. Currently, Encana's estimated costs for the EGS is approximately \$3,400,000.

Furthermore, all production proposed for commingling derives from the same geologic formation with similar projected gas rates and gas heating values as well as projected decline rates, which are addressed in Attachment No. 1.

In line with Encana's commitment to conduct business ethically, legally, and in a manner that is fiscally, environmentally and socially responsible, it is Encana's position that one (1) gathering system greatly reduces surface disturbance and thus environmental impact; and, is more economically feasible, allowing for potential capital to be dedicated towards future development projects in the San Juan Basin.

**Attachment No. 3:** Presents a leasehold ownership summary for all one hundred and twenty five (125) wells. The royalty interest is Federal, State, and Indian Allottee. The interest ownership reflected for each well is to the best of our knowledge at this time. In the event it is determined that interest ownership differs, an updated Attachment No. 3 will be sent to affected owners, the BLM, NMSLO, NMOCD, and the Federal Indian Minerals Office (FIMO). Encana is requesting that the NMOCD issued order for the EGS include a provision that for future additions to the EGS, only interest owners in the wells being added be notified.

**Attachment No. 4:** Presents a copy of the notice sent to the interest owners for the wells. All notice letters have been mailed certified, return receipt. Encana will provide a copy of the certified return receipt tracking number when they are electronically made available. Also included, is a copy of the legal notice requested to be published in The Daily Times, Farmington, New Mexico on January 8, 2017 in order to provide public notice to any and all affected interest owners. Encana will provide a copy of the affidavit of publication once this is made available.

**Attachment No. 5:** Presents the allocation procedures for the EGS which includes an example of how the allocation method is applied. Encana proposes that the Point of Royalty Measurement (PRM) be at EGS's CDP in Section 7, Township 24 North, Range 9 West. Please also note each well proposed for connection to the EGS will be equipped with a continuous recording gas allocation meter.

encana

**Attachment No. 6:** Presents well pad schematics and descriptions for the eleven (11) well pads that Encana is requesting to add to the EGS. In some instances, well pads have increased due to adding additional wells as well as the well pad schematics for the new well pads being added to the EGS. Encana requests approval to claim beneficial use at the gas lift injection meter on the well pads, which is depicted for each well pad on the well pad schematics. The well pad schematics also depict a list of proposed equipment. Encana requests the use of fuel to operate the gas lifts installed for each well.

In conclusion, Encana is requesting approval to add fifty-nine (59) wells to the Escrito Trunk #1 Gathering System (CGS). Where applicable, Encana requests Administrative Approval for Off-Lease Measurement and Sale of natural produced gas and Administrative Approval for Off-Lease Measurement, Sale and Transportation of produced crude oil and condensate. Further, Encana requests that the NMOCD order issued EGS also include a provision that for any future additions to the EGS, only the interest owners in the wells being added need to be notified.

Please feel free to contact me directly at 720-876-5331 with any questions or concerns.

#### APPLICATION FOR SURFACE COMMINGLING (DIVERSE OWNERSHIP)

OPERATOR NAME: Encana Oil and Gas (USA)

OPERATOR ADDRESS: 370 17<sup>th</sup> Street, Suite 1700, Denver, Colorado 80202

APPLICATION TYPE:

☐ Pool Commingling ☐ Lease Commingling ☒ Pool and Lease Commingling ☐ Off-Lease Storage and Measurement (Only if not Surface Commingled)

LEASE TYPE: ☒ Fee ☒ State ☒ Federal ☐ Allottee

Is this an Amendment to existing Order? ☒ Yes ☐ No If "Yes", please include the appropriate Order No. PLC-406  
Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling  
**Yes** ☐ No

#### (A) POOL COMMINGLING Please attach sheets with the following information

| (1) Pool Names and Codes                                                                                                                                                         | Gravities / BTU of Non-Commingled Production | Calculated Gravities / BTU of Commingled Production | Calculated Value of Commingled Production     | Volumes     |

Encina currently has completed 17 wells total, 9 of which produce from the **Blal Lower Gallup**, 6 which produce from the **Hagezi Unit** (H2) pool and 2 wells which production will be attributed to the pending **Barro Wash Unit** (H2) H2 Pool or whichever pool is designated for this Unit. Encina intends to drill and produce 54 wells on the **Hagezi Unit** (H2) Pool, 5 wells in the **Barro Wash Unit** (H2) Pool (or whichever pool is designated for this unit) and 6 wells in the **Basin Mancos Gas Pool**. Completion design is very similar in these wells. Initial flowback and hydrocarbon analysis results in the area show very similar BTU content.

Projected decline rates for all wells listed above: D4b: 75%/1.8

BTU value is lower over the 1st 6 months due to pumping nitrogen while completing the well. Nitrogen introduced while completing decreases over time as the well is produced. Future wells are contingent on success of initial wells.

\*It is Encana's intention to commit this well's production to the undivided Federal Blanco Wash Unit, which is pending final approval.

# Exhibit "A" Blanco Wash Unit

Revision Date 5/13/2015

San Juan County, New Mexico

T  
24  
N

The map displays the Nageezi Unit area, showing various water rights, pipelines, and land parcels. Key features include:

- Enterprise Field Services, LLC CDP**: Located in the upper left, with Escrito E07-2409 and Escrito M07-2409.
- Escrito Trunk #1, Phase 1**: A yellow line representing a pipeline running from the Enterprise Field Services, LLC CDP towards the Blanco Wash Unit.
- Blanco Wash Unit**: Located in the upper right, with Blanco Wash Unit 324H-327H and Blanco Wash Unit 328H.
- Nageezi Unit 320H-323H Pipeline**: A yellow line representing a pipeline running from the Blanco Wash Unit towards the Nageezi Unit.
- Nageezi Unit 503H-506H Pipeline (Planned)**: An orange line representing a planned pipeline running from the Nageezi Unit towards the Nageezi Unit.
- Nageezi Unit**: The central area, with various Nageezi Unit parcels labeled, including Nageezi Unit 101H-103H, Nageezi Unit 226H-229H, Nageezi Unit 219H-221H, Nageezi Unit 222H-225H, Nageezi Unit 324H-326H, Nageezi Unit 320H-323H, Nageezi Unit 405H-410H, Nageezi Unit 507H-512H, Nageezi Unit 513H-514H, Nageezi Unit 503H-506H, Nageezi Unit 501H-502H, Nageezi Unit 308H-313H, Nageezi Unit 304H-307H, Nageezi Unit 314H-319H, Nageezi Unit 207H-212H, Nageezi Unit 213H-218H, Nageezi Unit 226H-229H, Nageezi Unit 219H-221H, Nageezi Unit 222H-225H, Nageezi Unit 324H-326H, Nageezi Unit 320H-323H, Nageezi Unit 405H-410H, Nageezi Unit 507H-512H, Nageezi Unit 513H-514H, Nageezi Unit 503H-506H, Nageezi Unit 501H-502H, Nageezi Unit 308H-313H, Nageezi Unit 304H-307H, Nageezi Unit 314H-319H, Nageezi Unit 207H-212H, Nageezi Unit 213H-218H.
- Land Parcels**: Various land parcels are labeled with USA NM numbers, including USA NM 112955, USA NM 16760, USA NM 62973, USA NM 54983, USA NM 25842, USA NM 5991, USA NM 16760, USA NM 62973, USA NM 54983, USA NM 25842, USA NM 5991.
- Coordinates**: The map includes a grid with coordinates such as 23 24N 9 W, 23 24N 8 W, 23 23N 10 W, 23 23N 9 W, 23 23N 8 W.

The survey plat shows a grid with section numbers 25, 26, 27, 35, and 36. A dashed line indicates the horizontal drill path from the well flag to the bottom hole. Key points include:

- Well Flag:** Located at the intersection of Section 27 and 35.
- Entry Point (EP):** Located at the intersection of Section 26 and 35.
- Bottom Hole:** Located at the intersection of Section 35 and 36.
- Horizontal Drill Distance:** 5331.88'.
- Bearings and Distances:** Various bearings and distances are provided for the boundaries and internal points.

Example Letter  
To Interest Owners

**Re: 2nd Amendment to the Escrito Trunk #1 Gathering System  
Application for Pool and Lease Commingling  
Add Wells to Gathering System and Off-Lease Measurement (if applicable)  
San Juan County, New Mexico**

Dear Interest Owner:

Encana Oil & Gas (USA) Inc.'s (Encana) is seeking administrative approval from the New Mexico Oil Conservation Division (NMOCD) to add additional wells to the Escrito Trunk #1 Gathering System (EGS) NMOCD identification number PLC-378A. The EGS is operated by Encana, and the addition of wells will require surface commingling of gas, and in some cases off-lease measurement and sale of produced natural gas, as well as off-lease transportation and sale of oil and condensate. All of the additional wells proposed to tie into the EGS will be operated by Encana. Encana has applied for the necessary rights-of-way to install, operate and maintain the EGS.

Off-Lease Measurement and Sale of produced natural gas, as well as Off-Lease Transportation and Sale of crude oil and condensate, may also be applicable for some of the additional proposed wells tying into the EGS. If applicable, Off-Lease Measurement of natural gas will occur at the well head by a well allocation meter and again at the pipeline tie-in to either Enterprise Field Services, LLC's central delivery point, gas custody transfer meter.

The wells will be equipped with individual gas measurement equipment for allocation purposes and will benefit from central compression which should keep wellhead operating pressure as low as possible. There will not be any downhole commingling of oil or condensate.

If applicable, Off-Lease Measurement, Transportation and Sale of produced oil and condensate will occur at the surface location for the affected well where Encana will install the necessary number of 400-barrel oil storage tanks and water tanks. A gathering company will purchase and transport the product to refining. A strapping table measurement for each oil tank will determine the volume in each tank with run tickets will be filled out at the surface location for each load. Tank seal information will also be recorded to accompany the transport.

This matter does not require any action on your part. Current NMOCD Regulations require that all affected interest owners receive notice of Off-Lease Measurement, Transportation and Sale, and receive notice of proposed future additions to the EGS. Included in Encana's Gathering System application is a request that for future additions to the EGS, only the interest owners in the wells to be added will require notification provided that the proposed additions do not adversely affect the existing wells in the EGS. This will greatly simplify adding wells to the gathering system. Should you have any questions, concerns or need additional information please contact me at your earliest convenience at [Mona.Binion@encana.com](mailto:Mona.Binion@encana.com) and/or 370 17th Street, Suite 1700, Denver, Colorado 80202.

**Encana Oil & Gas (USA) Inc., acting by and through its authorized agent,  
Encana Services Company Ltd.**

370 17<sup>th</sup> Street, Suite 1700, Denver Colorado 80202 [Mona.Binion@encana.com](mailto:Mona.Binion@encana.com)

Should you have any objections to our application, please contact the undersigned; you should also contact the NMOCD directly with your objections within twenty (20) days from the date the NMOCD receives our application. The mailing address for the NMOCD is 1220 St. Francis Drive, Santa Fe, New Mexico 87505. We would appreciate a copy of your objection.

**Re: Legal Ad Placement Request**  
**SUNDAY January 8<sup>th</sup>**  
Amendment to Escrito Trunk #1 Gathering System  
San Juan County, New Mexico

Ladies and Gentlemen:

Encana Oil & Gas (USA) Inc. (Encana) respectfully requests The Daily Times place the following notice in the Legal Ads section for the Sunday, January 8th publication. Once the ad has run, please send an Affidavit of Publication to the undersigned.

*Encana oil & Gas (USA) Inc. (Encana) is seeking administrative approval from the New Mexico Oil Conservation Division (NMOCD), the Bureau of Land Management (BLM), Federal Indian Minerals Office (FIMO) and the New Mexico State Land Office to add fifty-nine (59) additional wells to the Encana operated Escrito Trunk #1 Gathering System (EGS). The interconnection of the additional fifty-nine (59) wells to the Gathering System will require surface commingling. Said application also requests administrative approval of Off-Lease Measurement and sale of naturally produced gas; and in some instances Off-Lease Transportation and Sale of oil and condensate for various wells operated by Encana in Sandoval County, New Mexico. The EGS interconnects with Enterprise Field Services, LTD (Enterprise) pipeline in Section 7, Township (T) 24 North, Range (R) 9 West which will be known as the Central Delivery Point (CDP). The additional fifty-nine (59) wells will be attributed to the Nageezi Unit, which is a fully approved undivided Federal Unit as well as the Blanco Wash Unit, which is pending approval for an undivided Federal Unit. The Nageezi Unit is comprised of the following project area: S2 of Sections 21-23, All of Sections 25-28, T24N R9W; All of Sections 1-4, E2 of Section 5, All of Sections 9-10, NW of Section 11, T23N R9W (10,415.12 acres). The Blanco Wash Unit is comprised of the following project area: All of Sections 6-7 & 18-19 T24N R8W; All of Section 1, E2 of Section 2, W2 of Section 4, All of Sections 5 & 8-17 & 20, N2 of Sections 21-23, All of Section 24 T24N R9W (13,128.47 acres). Encana is currently in the process of securing title opinions for the Blanco Wash Unit. There will not be any commingling of oil or condensate with natural gas in the pipeline. The undivided Federal Unit project areas described above will be completed in the Mancos formation. Any person holding an interest in the lands listed above may contact Encana for additional information (Attn: Mona Binion, (720) 876-5325, 370 17<sup>th</sup> Street, Suite 1700, Denver, CO 80202; [mona.binion@encana.com](mailto:mona.binion@encana.com)). Any objection or request for a formal hearing should be filed in writing with the NMOCD's Santa Fe Office (1220 South St. Francis Drive, Santa Fe, NM 87505) within 20 days from the date of this publication. In the absence of objections, Encana is requesting that the NMOCD approve the application administratively.*

### Gas Measurement Allocation Procedure for Multi-Well Pads

Attachment No. 5  
Encana Oil & Gas (USA) Inc.  
Escrito Trunk #1 Gathering System  
San Juan County, New Mexico

WI<sub>2</sub>

**Base Data:**

V = Gas Volume (MCF) from Custody Transfer Meter during allocation period (Enterprise Field Services, LLC)  
X<sub>x</sub> = Gas Volume (MCF) from Pad Allocation Meter during allocation period. (Encana)  
R<sub>x</sub> = Gas Volume (MCF) from Gas Return Meter at Well Pad (Encana)\*  
(X<sub>x</sub> - R<sub>x</sub>) = Gas Volume (MCF) for total Well Pad Production (Encana)  
W<sub>x</sub> = Gas Volume (MCF) from Wellhead Allocation Meter at individual wells during allocation period. (Encana)  
WI<sub>x</sub> = Gas Volume (MCF) from Well Injection Meter at individual wells during allocation period. (Encana)\*  
Y = Heating Value (BTU/scf) from Custody Transfer Meter during allocation period. (Enterprise Field Services, LLC)  
Z = Heating Value (BTU/scf) from individual Wellhead Allocation Meter and Well Injection Meter. (Encana)

Allocation Period is typically a calendar month and will be the same for all Well Pads and individual wells.

**Allocate the off lease Custody Transfer volume back to the well pad**

$$A_{AL} = \text{Well pad allocated volume (MCF)} = [(X_1 - R_1) / ((X_1 - R_1) + (X_2 - R_2) + \dots + (X_n - R_n))] * (V) + D + E$$

**Distribute (allocate) the allocated well pad production, (A<sub>AL</sub>) back to each well on the pad**

Gas production (MCF) allocated back to the individual wells on a Well Pad is calculated using the formula:

$$AL \text{ Net}_n = [(W_1 - WI_1) / ((W_1 - WI_1) + (W_2 - WI_2) + \dots + (W_n - WI_n))] * A_{AL}$$

**Determine the final allocated production for each well on the pad**

$$\text{Final allocated individual well production (MCF)} = AL \text{ Net}_n + B_n + C_n$$

B<sub>n</sub> = On lease fuel usage attributed to an individual well, MCF. Determined from equipment specification and operating conditions. This includes, but is not limited to, compression, vapor recovery unit (VRU) compression, burners, and pump jacks.

Attachment No. 5  
Encana Oil & Gas (USA) Inc.  
Escrito Trunk #1 Gathering System  
San Juan County, New Mexico

$C_n$  = Lost and/or vented gas attributed to an individual well from well and/or lease equipment, MCF. Calculated using equipment and piping specifications and operating pressures.

$D$  = Allocated fuel from gathering system equipment, MCF. The total fuel required to operate gathering system equipment will be allocated to the Well Pads benefiting from the equipment using allocation factors determined by  $[(X_1-R_1)/((X_1-R_1)+(X_2-R_2)+(X_n-R_n))]$  and for individual wells using allocation factors determined by  $[(W_1-WI_1)/((W_1-WI_1)+(W_2-WI_2)+(W_n-WI_n))]$ .

$E$  = Allocated volume of gas lost and/or vented from the gathering system, gathering system equipment, condensate collection, and water collection in MCF. The total volume will be determined using industry accepted procedures the time of the loss. The total volumes lost and/or vented will be allocated to the Well Pads affected using factors determined by  $[(X_1-R_1)/((X_1-R_1)+(X_2-R_2)+(X_n-R_n))]$ , and for individual wells using factors determined by  $[(W_1-WI_1)/((W_1-WI_1)+(W_2-WI_2)+(W_n-WI_n))]$ .

**Individual Well BTU's** =  $[(\{(W_n-WI_n)*Z_n\}/\{SUM((W_n-WI_n)*Z_n)\})*(V*Y)*1000]$

Individual well gas heating values to be determined in accordance with BLM regulations.

**Re: 2<sup>nd</sup> Amendment - Escrito Trunk #1 Gathering System PLC-378**  
**Affidavit of Publication**  
San Juan County, New Mexico

Dear Mr. Catanach, Ms. Barr and Mr. Dunn,

Encana Oil & Gas (USA) Inc. (Encana) submits for your records and review a copy of the Affidavit of Publication (Affidavit) from the Farmington Daily Times. The Affidavit details the notice that was published in the Sunday, January 8<sup>th</sup> publication in the Farmington Daily Times to notify an interest owner of Encana's application to add additional wells to the Escrito Trunk #1 Gathering System (EGS).

Please feel free to contact me directly at 720-876-5331 with any questions or concerns.

## COPY OF PUBLICATION

Encana oil & Gas (USA) Inc. (Encana) is seeking administrative approval from the New Mexico Oil Conservation Division (NMOCD), the Bureau of Land Management (BLM), Federal Indian Minerals Office (FIMO) and the New Mexico State Land Office to add fifty-nine (59) additional wells to the Encana operated Escrito Trunk #1 Gathering System (EGS). The interconnection of the additional fifty-nine (59) wells to the Gathering System will require surface commingling. Said application also requests administrative approval of Off-Lease Measurement and sale of naturally produced gas; and in some instances Off-Lease Transportation and Sale of oil and condensate for various wells operated by Encana in Sandoval County, New Mexico. The EGS interconnects with Enterprise Field Services, LTD (Enterprise) pipeline in Section 7, Township (T) 24 North, Range (R) 9 West which will be known as the Central Delivery Point (CDP). The additional fifty-nine (59) wells will be attributed to the Nageezi Unit, which is a fully approved undivided Federal Unit as well as the Blanco Wash Unit, which is pending approval for an undivided Federal Unit. The Nageezi Unit is comprised of the following project area: S2 of Sections 21-23, All of Sections 25-28, T24N R9W; All of Sections 1-4, E2 of Section 5, All of Sections 9-10, NW of Section 11, T23N R9W (10,415.12 acres). The Blanco Wash Unit is comprised of the following project area: All of Sections 6-7 & 18-19 T24N R8W; All of Section 1, E2 of Section 2, W2 of Section 4, All of Sections 5 & 8-17 & 20, N2 of Sections 21-23, All of Section 24 T24N R9W (13,128.47 acres). Encana is currently in the process of securing title opinions for the Blanco Wash Unit. There will not be any commingling of oil or condensate with natural gas in the pipeline. The undivided Federal Unit project areas described above will be completed in the Mancos formation. Any person holding an interest in the lands listed above may contact Encana for additional information (Attn: Mona Binion, (720) 876-5325, 370 17th Street, Suite 1700, Denver, CO 80202; mona.binion@encana.com). Any objection or request for a formal hearing should be filed in writing with the NMOCD's Santa Fe Office (1220 South St. Francis Drive, Santa Fe, NM 87505) within 20 days from the date of this publication. In the absence of objections, Encana is requesting that the NMOCD approve the application administratively.

ADMINISTRATIVE POOL/LEASE COMMINGLING ORDER

Administrative Order PLC-378-A  
Administrative Application Reference No. pMAM1420333003

Encana Oil & Gas (USA) Inc.  
Attn: Ms. Jessica Gregg

Pursuant to your application received on July 21, 2014, Encana Oil & Gas (USA) Inc. (OGRID 282327) is hereby authorized to surface commingle **gas production only** from the following pools:

|                          |         |
|--------------------------|---------|
| Bisti Lower Gallup (Oil) | (5890)  |
| Bisti, South-Gallup      | (5860)  |
| Basin Mancos (Gas)       | (97232) |
| Nageezi Unit Hz (Oil)    | (98080) |

and from the following diversely owned wells. These wells are identified in Attachment No. 1, and made part of this order. These wells are located on federal and state leases in said Townships and Ranges in San Juan County, New Mexico.

Each well produces from only the pool or pools identified on Attachment No. 1.

Each well will be equipped with an individual gas meter for allocation purposes. Gas that has passed through the well meters will be commingled in operator's Escrito Trunk No. 1 Gathering System, and will be again measured, and sold, at the transfer point on Enterprise Products Partners' pipeline, located in the NW/4 NW/4 of Section 7, Township 24 North, Range 9 West, San Juan County, New Mexico.

The operator shall notify the transporter of this commingling authority.

The operator shall notify the Aztec district office of the Division upon commencement of commingling operations.

This approval is subject to like approval from the United States Bureau of Land Management and the New Mexico State Land Office before commencement of the commingling operations.
