RE: BLACK RIVER SWD,
API 30-015-43807
Eddy Co., NM
Administrative Order SWD-1627

Dear Sir:

Black River Water Management Company, LLC, OGRID 371287, respectfully requests approval to inject through 5 ½" tubing for the Black River SWD, as it poses no issues of approaching the formation fracture pressure based on the BHP data attached.

The Black River SWD started injecting water at year end 2016 and now has two months of reliable injection data. The well is only able to inject ~21,000 bbls/d which is far below the expected rate. Injection is through 4 ½" internally-coated tubing and at no more than 2740 psi as specified by the above-referenced Administrative Order.

On February 21st, we placed a BHP memory gauge and conducted both a step-rate and injection falloff test confirming the deliverability restriction is due to pressure loss. At the maximum step-rate of 12.05 bbl/min (17,352 bbl/d), there was 1486.4 psi of friction loss, only 253.7 psi above the formation pore pressure to deliver water into the reservoir. The installation of 5 ½" tubing will allow injection to reach a rate of +30,000 bbl/d which is consistent with other commercial SWDs and poses no issue to the reservoir integrity.

Please see the enclosed test data and copy of the specifications for the proposed 5 ½" tubing. If you need further information, please don't hesitate to contact me at 972-371-5448 or via email at vmahadevan@matadorresources.com.

Thank you,

Vinny Mahadevan
Operations Manager, Midstream

RE: Black River SWD No. 1 (30-015-43807) SWD-1627

Ms. Monroe and Mr. Mahadevan:

The Division is in receipt of your request to increase the tubing size in this Devonian disposal well. Other operators have also shown interest in obtaining similar increases in tubing size for their deeper disposal well. Pursuant to the request by the Director that a hearing be conducted to assess and decide on future increases, I am forwarding information for Case No. 15654 which has been filed by Mesquite for increases in the tubing size. It benefit your request to have a discussion with their legal counsel regarding this case and the subject matter. Otherwise, the request that Matador has made for the Black River will remain under consideration pending the outcome of this case. Please contact me with any questions regarding this matter. PRG

Subject: SWD - Tubing Change Question

Mr. McMillan,

To apply to change tubing size in a currently injecting SWD (4 ½ " to 5 ½"), the UIC manual says to write a letter to the Division Director.

Other than the reason for the requested change and supporting documents, are there any other requirements to apply administratively to change the tubing?

Thanks,
Ava
