Application for surface commingle, Langley; Strawn Oil Lea County, NM (T22S, R36E, Section 21)

Dear Sirs,

Chevron U.S.A. Inc. respectfully requests administrative approval to surface commingle oil, gas and water production from the Langley Strawn Pool through Chevron's Langley Greer 4 Central Tank Battery. Chevron requests the approval to minimize surface disturbance, future traffic and reducing spill risk by concentrating activities at one battery. Wells producing to this battery include the Langley Boren #2, Langley Boren #3, Langley Greer #1, Langley Greer #2, and Langley Greer #4. These wells are located in Section 20 and 21, T 22S, R 36E in Lea County, New Mexico.

The working interest varies among the wells but the royalty rate is the same for all leases involved in this request. These wells were completed in 1978, 1988, 1990, 1991, & 2008. Each well will be tested monthly through turbine meters installed on the three phase separator and the gas allocation meter. There are two oil tanks at the CTB that the wells utilize and total oil will be measured by having a qualified field personnel gauge. Each well will be tested monthly through a three phase separator located at the Langley Greer 4 CTB. Oil and water are measured by a turbine meter on the oil and water outlets and gas is measured by an orifice meter on the gas outlet.

Sincerely,

A handwritten signature in cursive script that reads "Cindy Herrera-Murillo".

Chevron U.S.A. Inc. understands that the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

All royalty and overriding interest owners will be notified. Chevron is the only working interest owner.

NOTE:

Please be advised, that while reasonable efforts are made to locate and verify pipelines and anomalies using non standard pipeline locating equipment, it is impossible to be 100% effective. As such, we advise using caution when performing work as there is a possibility that pipelines and other hazards, such as fiber optic cables, PVC pipelines, etc. may exist undetected on site.

NOTE:

Many states maintain information centers that establish links between those who dig (excavators) and those who own and operate underground facilities (operators). It is advisable and in most states, law, for the contractor to contact the center for assistance in locating and marking underground utilities. For guidance: New Mexico One Call - www.onecall.org

DISCLAIMER: At this time, C. H. Fenstermaker & Associates, L.L.C. has not performed nor will be asked to perform any type of engineering, hydrological modeling, flood plain, or "No Rise" certification analysis, including but not limited to determining whether the project will impact flood hazards in connection with federal/FEMA, state and/or local laws, ordinances and regulations. Section 21, T22S, R36E

Dear Sirs,

Chevron U.S.A. Inc. respectfully requests administrative approval to surface commingle oil, gas and water production from the Langley Strawn Pool through Chevron's Langley Greer 4 Central Tank Battery. Chevron requests the approval to minimize surface disturbance, future traffic and reducing spill risk by concentrating activities at one battery. Wells producing to this battery include the Langley Boren #2, Langley Boren #3, Langley Greer #1, Langley Greer #2, and Langley Greer #4. These wells are located in Section 20 and 21, T 22S, R 36E in Lea County, New Mexico.

The working interest varies among the wells but the royalty rate is the same for all leases involved in this request. These wells were completed in 1978, 1988, 1990, 1991, & 2008. Each well will be tested monthly through turbine meters installed on the three phase separator and the gas allocation meter. There are two oil tanks at the CTB that the wells utilize and total oil will be measured by having a qualified field personnel gauge. Each well will be tested monthly through a three phase separator located at the Langley Greer 4 CTB. Oil and water are measured by a turbine meter on the oil and water outlets and gas is measured by an orifice meter on the gas outlet.

Any objections to this commingle must be sent to the New Mexico Conservation Division; 1220 South St. Francis Drive; Santa Fe, NM 87504, within 20 days of receipt of this notification. If you require additional information,

Sincerely,

Cindy Herrera-Murillo
