APPLICATION FOR SURFACE COMMINGLING (DIVERSE OWNERSHIP)

OPERATOR NAME: McElvain Energy Inc
OPERATOR ADDRESS: 1050 17th Street, Suite 2500, Denver, CO 80265
APPLICATION TYPE:

☐ Pool Commingling ☐ Lease Commingling ☒ Pool and Lease Commingling ☐ Off-Lease Storage and Measurement (Only if not Surface Commingling)

LEASE TYPE: ☒ Fee ☐ State ☒ Federal

Is this an Amendment to existing Order? ☐ Yes ☒ No If "Yes", please include the appropriate Order No. _____
Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling
☒ Yes ☐ No

(A) POOL COMMINGLING
Please attach sheets with the following information

(1) Pool Names and Codes	Gravities / BTU of Non-Commingled Production	Calculated Gravities / BTU of Commingled Production		Calculated Value of Commingled Production	Volumes
Pool 21650, EK Bone Springs EK 29 BS2 Fed Com 1H	38/1350	38/1350		\$45 BO / \$3 MCF	600BOPD 600MCFD
Pool 21650, EK Bone Springs EK 29 BS2 Fed Com 2H	38/1350				600BOPD 600MCFD

- (2) Are any wells producing at top allowables? ☐ Yes ☒ No
(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No
(4) Measurement type: ☒ Metering ☐ Other (Specify) _____
(5) Will commingling decrease the value of production? ☐ Yes ☒ No If "yes", describe why commingling should be approved _____

(B) LEASE COMMINGLING
Please attach sheets with the following information

- (1) Pool Name and Code: _____
(2) Is all production from same source of supply? ☒ Yes ☐ No
(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No
(4) Measurement type: ☒ Metering ☐ Other (Specify) _____

(C) POOL and LEASE COMMINGLING
Please attach sheets with the following information

- (1) Complete Sections A and E.

(D) OFF-LEASE STORAGE and MEASUREMENT
Please attach sheets with the following information

- (1) Is all production from same source of supply? ☐ Yes ☐ No
(2) Include proof of notice to all interest owners.

(E) ADDITIONAL INFORMATION (for all application types)
Please attach sheets with the following information

- (1) A schematic diagram of facility, including legal location.
(2) A plat with lease boundaries showing all well and facility locations. Include lease numbers if Federal or State lands are involved.
(3) Lease Names, Lease and Well Numbers, and API Numbers.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

McElvain Energy, Inc. is requesting approval for a Central Tank Battery and Surface Lease Commingle.

The central tank battery will be located on the shared pad for the EK 29 BS2 Fed Com 1H & 2H located in NENE Sec. 29-T18S-R34E. The production from each well will have its own three phase metering separator with Coriolis to meter the oil, flow meter to meter the water and gas orifice allocation meter to meter the gas. VRU gas production will be allocated back to each well utilizing each wells monthly oil production.

The EK 29 BS2 Fed Com 1H & 2H will have four oil tanks that all wells will utilize and they have a common Targa Central Delivery Point (number to be provided upon receipt) meter which is located on the southeast corner of the location. Oil, gas and water volumes from these wells producing to this battery will be determined by using an individual metering separator per well.

Attached are the required supporting documents as per IM NMPO-2013-02 & 43 CFR 3173.14 for the Central Tank Battery and Surface Lease Commingle request.

14. I hereby certify that the foregoing is true and correct. Name (Printed/Typed)

(Instructions on page 2)

APPLICATION FOR A CENTRAL TANK BATTERY & LEASE COMMINGLE

Central Tank Battery Proposal for the EK 29 Fed Com 1H and 2H Wells:

McElvain Energy, Inc. is requesting approval for the Central Tank Battery and Lease Commingle for the following wells:

Federal Lease: NMNM0245247 & NMNM012277

Well Name	Location	API #	Pool 21650	Oil BOPD	Gravities	MCFPD	BTU
EK 29 BS2 Fed Com 1H	NENE Sec.29 T18SR34E	30-015-43687	EK; Bone Spring	600*	38*	600*	1350*

Federal Lease: NMNM0245247 & NMNM012277

Well Name	Location	API #	Pool 21650	Oil BOPD	Gravities	MCFPD	BTU
EK 29 BS2 Fed Com 2H	NENE Sec.29 T18SR34E	30-015-43686	EK; Bone Spring	600*	38*	600*	1350*

These are proposed totals for these wells; once these wells are drilled the production information will be amended. I will submit production volumes for the EK 29 BS2 Fed Com 1H & 2H upon receipt.

Attached map displays the federal leases and well locations in NENE Sec. 29-T18S-R34E.

Although the Federal royalty rate is the same in both wells (Federal Lease NMNM0245247 and NMNM012277 is 12.5%); there is a 25% private mineral interest in the SESE Sec. 29 T18SR34E associated with the EK 29 BS2 Fed Com 1H well.

Even though the mineral ownership in both wells is different, McElvain Energy Inc. is confident that commingling these wells is in the best interest of the public and meets the requirements set forth in 43 CFR 3173.14 for approval of a CAA.

43 CFR 3173.14 states;

"(2) The operator or operators must provide a methodology acceptable to BLM for allocation among the properties from which production is to be commingled (including a method for allocating produced water), with a signed agreement if there is more than one operator;

(3) For each of the leases, unit PAs, or CAs proposed for inclusion in the CAA, the applicant demonstrates to the AO that a lease, unit PA, or CA proposed for inclusion is producing in paying quantities (or, in the case of Federal leases, capable of production in paying quantities) pending approval of the CAA; and

(4) The FMP(s) for the proposed CAA measure production originating only from the leases, unit PAs, or CAs in the CAA."

Overriding considerations for CAA approval include:

1. Reduced surface disturbance to public lands where additional measurement and production related equipment necessary to achieve non-commingled measurement would have to be located reducing impacts to special status species such as the Lesser Prairie Chicken and the Sand Dunes Lizard.
2. The ability to access and develop all of the available oil and gas resources in the final 25% of the horizontal lateral in the EK 29 BS2 Fed Com 1H well thus reducing the possibility of stranding valuable resources.

Allocation Methodology:

The central tank battery is located on the shared pad for the EK 29 BS2 Fed Com 1H & 2H located in NENE Sec. 29-T18S-R34E. The production from each well will have its own three phase metering separator with Coriolis to meter the oil, flow meter to meter the water and gas orifice allocation meter to meter the gas. VRU gas production will be allocated back to each well utilizing each wells monthly oil production.

The EK 29 BS2 Fed Com 1H & 2H will have four oil tanks that all wells will utilize and they have a common Targa Central Delivery Point (number to be provided upon receipt) meter which is located on the southeast corner of the location. Oil, gas and water volumes from these wells producing to this battery will be determined by using an individual metering separator per well.

EK 29 BS2 Fed Com 1H production flows to its own three phase metering separator, where after separation gas is routed to the gas orifice allocation meter (number to be provided upon receipt) then to the common Targa Central Delivery Point (number to be provided upon receipt) meter. Produced water and oil are separated; the oil is then metered with a Coriolis meter (number to be provided upon receipt) and combines with the other well's oil into a common heater treater, then into a common production line and to one of the 1000 bbl oil tanks. The water is metered using a flow meter and then flows into a common produced water line and to one of the 1000 bbl produced water tanks. Oil will be sold by truck loadout using manual tank gauging (numbers to be provided upon receipt).

EK 29 BS2 Fed Com 2H production flows to its own three phase metering separator, where after separation gas is routed to the gas orifice allocation meter (number to be provided upon receipt) then to the common Targa Central Delivery Point (number to be provided upon receipt) meter. Produced water and oil are separated; the oil is then metered with a Coriolis meter (number to be provided upon receipt) combines with the other well's oil into a common heater treater, then into a common production line and to one of the 1000 bbl oil tanks. The water is metered using a flow meter and then flows into a common produced water line and to one of the 1000 bbl produced water tanks. Oil will be sold by truck loadout using manual tank gauging (numbers to be provided upon receipt).

Oil production will be allocated on a daily basis based on the well's individual Coriolis meters. These meter will be proven, as per API, NMOCD and BLM specifications, when installed, once per month for the first 3 months (to establish a consistent repeatability factor), and then quarterly thereafter, the factor obtained will be used to allocate the production volumes. Oil from both wells will then commingle into a common heater treater then into a common production line and to one of the 1000 bbl oil tanks. Oil will be sold by truck loadout using manual tank gauging (numbers to be provided upon receipt). Gas production will be allocated on a daily basis based on the subtraction method from the common Targa Central Delivery Point (number to be provided upon receipt) meter and the well's individual gas orifice allocation meters. The gas production from the VRU and the well's individual gas orifice allocation meters will commingle and flow through the common Targa Central Delivery Point (number to be provided upon receipt) meter on the southeast corner of the location. These meters will be calibrated on a regular basis per API, NMOCD and BLM specifications. The BLM & OCD will be notified of any future changes in the facility.

Process and Flow Descriptions:

Please see the proposed facility diagram for the EK 29 BS2 Fed Com 1H & 2H location. The proposed commingling is appropriate based on the BLM's guidance in IM 2013-02. The proposed commingling will maximize the ultimate recovery of oil and/or gas from the federal leases and will reduce environmental impacts by minimizing surface disturbance and emissions. The proposed commingling will reduce operating expenses, as well as, not adversely affect federal royalty income, production accountability, or the distribution of royalty.

McElvain Energy Inc. understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

Working, royalty, and overriding interest owners have been notified of this proposal via certified mail (see attached list).

Signed:

Interest Owner:

This is to advise you that McElvain Energy, Inc., as general partner and operator for T. H. McElvain Oil & Gas LLLP ("McElvain"), is filing an application with the New Mexico Oil Conservation Division ("NMOCD") seeking approval for a Central Tank Battery & Off-Lease Gas Measurement, Sales, & Storage for the above mentioned wells.

A copy of our application submitted to the Division is attached.

Any objections or requests that a hearing should be held regarding this application much be submitted to the New Mexico Oil Conservation Division Santa Fe office within 20 days from the date of this letter.

Please contact the undersigned at 303-962-6487 should you have any questions or need anything further.

Sincerely,

McElvain Energy, Inc.

Rick Harris
Land Manager

Subject: RE: EK 29 BS Fed Com Well No. 1H surface commingle application

Your API numbers are wrong
The 1H well API is 30-025-43687
The 2H API is 30-025-43676
You will need to notify the BLM of this, because the API in your application is in Eddy County
Mike

Mike, see response below from our Land Manager. There are only 2 wells involved in the proposed commingling application;
EK 29 BS2 Federal Com 1H & EK 29 BS2 Federal Com 2H

Thx

No we are not going to have to commence Compulsory Pooling on either of these wells.

Thanks,

Rick Harris

Rick, can you help me answer this question please! I think the answer is no but wanted to be sure.

From: McMillan, Michael, EMNRD [<mailto:Michael.McMillan@state.nm.us>]
Sent: Friday, May 12, 2017 10:26 AM
To: Tony Cooper
Subject: RE: EK 29 BS Fed Com Well No. 1H surface commingle application

Were any of these wells part of a forced (compulsory) pooling by the NMOCD? This occurs when there are lost interest, or another party chooses not to participate in the well.

So there were only two wells involved-is that correct?

Thank You

Mike

Michael please let me know if you need anything further.

- C-102's attached
- The wells won't be drilled until this summer. I could provide a production estimate if you would like?
- CA agreement is in process but not yet approved.
- Thomaston LLC is a subsidiary of McElvain Energy Inc.

I do not think the wells are part of a OCD Divison Order but I am not exactly sure what you are asking about. Please advise?

Subject: EK 29 BS Fed Com Well No. 1H surface commingle application

Tony

I need the following information for the EK 29 BS Fed Com Well No. 1H surface commingle application

- C-102 for all wells in the proposed surface commingle application
- Last 6 month's monthly production, if wells have less than 6 months production provide the available monthly production. Include the number of days in the month the wells produced.
- Provide the CA agreement number
- If the wells were part of an OCD Division Order, supply that information
- I noticed Thomaston, LLC was not notified-are they affiliated with McElvain?

Your application will be suspended until the OCD receives the required information. If the required information is not received within 10 days, your application will be cancelled.
