North Teague Drinkard-Abo (Oil - 96313) Pools*

Dear Ms. Leake:

Reference is made to your recent application for an amendment to Division Order No. DHC-2176, which order authorized the downhole commingling of North Teague-Tubb Associated and North Teague Drinkard-Abo Pool production within the F. B. Davis Well No. 1, to add the North Teague Lower Paddock-Blinebry Pool as a third commingled zone in the well.

It appearing that the subject well qualifies for approval for such amendment pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303.C., the daily allowable producing rates from the well are hereby established as follows:

Oil 107 B/D

Gas 642 MCF/D

The applicant shall consult with the supervisor of the Hobbs District Office of the Division upon completion and testing of the well in order to establish a fixed allocation of production from each of the commingled zones. Upon approval by the Division's Hobbs District Office, the applicant shall submit the allocation formula to the Santa Fe Office of the Division.
