If a Watercourse was Impacted, Describe Fully.* <u>N/A</u>		
Describe Cause of Problem and Remedial Action Taken.* <u>Back pressure valve on the three-phase separator failed causing the PRV to open. The well was shut in to stop the release and repairs have been made.</u>		
Describe Area Affected and Cleanup Action Taken.* <u>Approximately 657.4 MCF was released.</u>		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Subject:** Tomb Raider 1 Fed 1H Battery (API #30-015-42655) Release Notification

Good morning,

Devon identified the following release at approximately 7:33 AM MST on 05/17/18.

1. Tomb Raider 1 Fed 1H Battery (API #30-015-42655)  
Due to a back pressure valve malfunctioning, an inlet three phase separator pressured up and released approximately 657.4 mcf of gas out of the pressure relief valve. There were no fluids associated with this release.

A C-141 will be prepared and submitted with GPS coordinates of the area affected.

Thanks,

**Brett Fulks**  
EHS Representative
