ADMINISTRATIVE POOL/LEASE COMMINGLING ORDER

Administrative Order PLC-551

Chevron USA Inc.  
Attention: Laura Becerra

Pursuant to your application received on January 23, 2019, Chevron USA Inc. (OGRID 16696) is hereby authorized to surface commingle oil and gas production and off-lease measure from the following pools:

WC-025 G-06 S263319P; BONE SPRING (97955)  
SANDERS TANK; UPPER WOLFCAMP (97087)

and from wells, their associated leases, pools, and noted range of production decline as identified in the application, Exhibit "A" made a part of this order. These wells are located on federal leases and federal communitization agreements located in Township 26 South, Range 33 East, NMPM, Lea County, New Mexico.

Production from the subject wells shall be determined as follows:

It is understood that the test separator and meters are designed to accurately measure production from the wells with the highest production rate. It is also assumed that all the oil and gas production from the wells in this application will display a hyperbolic decline and will fit the decline parameters described in Hearing Order R-14299. Wells that are in "prior- to" Range 1 of decline shall be tested daily. Wells that are in Range 1 of decline shall be measured with a combination of metering and well testing and shall be tested at least three times a month. Wells that are in Range 2 of decline shall be measured with a combination of metering and well testing and shall be tested at least twice a month. Wells in Range 3 of decline shall be measured with a combination of metering and well testing and shall be tested at least once a month.

The commingled oil production from the wells detailed above shall be measured and sold at the Salado Draw Central Tank Battery (CTB), located in Lot 1/ Unit D of Section 19, Township 26 South, Range 33 East, NMPM, Lea County, New Mexico.

Chevron USA Inc. shall provide a Sundry Notice to the Engineering Bureau in Santa Fe when a dedicated separator is removed.

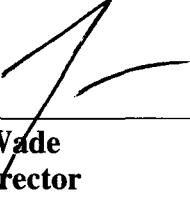

The allocation meters shall be calibrated quarterly in accordance with Rule 19.15.12.10.C (2) NMAC.

This approval is subject to like approval from the Bureau of Land Management before commencing commingling operations.

Subsequently drilled wells that produce from the subject pool within the project areas approved by this order may be added to this commingling authority by submittal of a Sundry Notice to the Engineering Bureau in Santa Fe.

This administrative order supersedes Administrative Order CTB 772-A, issued on June 14, 2016. This order adds additional acreage and the Sanders Tank; Upper Wolfcamp Pool.

The operator shall notify the Hobbs District office of the Division prior to implementation of the commingling operations.

---
