AMENDED  
Administrative Order TX-165

Gentlemen:

Reference is made to your request for an exception to the tubing setting requirements as contained in Division Rule 107(d)(3) for the below-named well.

Pursuant to the authority granted me by Rule 107(d)(4), you are hereby authorized to make a tubingless completion in the following well:

Well Name and Number: Salazar Well No. 13

Location: Unit F, Sec. 27, T-25-N, R-6-W, NMPM,  
Rio Arriba County, New Mexico

Remarks: In the event that this well should start producing fluids the Division's Aztec Office will be notified in order that this Administrative Order can be reviewed.

The Division reserves the right to rescind this authority in the event that waste appears to be resulting therefrom.

Very truly yours,

R. L. STAMETS,  
Division Director

OIL AND GAS

2346 EAST 20TH STREET  
P. O. BOX 1258 • FARMINGTON, NEW MEXICO 87499

TELEPHONE: (505) 327-6176

August 26, 1986

Mr. R. L. Stamets  
Oil Conservation Division  
P. O. Box 2088  
Santa Fe, NM 87501

Dear Mr. Stamets:

During October 1985, Curtis J. Little drilled the Salazar #13 located 1890' FNL and 1490' FWL of Section 27, T-25N, R-6W in Rio Arriba County, New Mexico.

This well was drilled to 3265' with the plans of a Chacra, Pictured Cliff dual completion. Thus, 4-1/2" casing was set at 3253'. The well logs indicated the Chacra zone was not commercial.

The Pictured Cliff was perforated and treated with 22,300 gal. 70 Quality foam and 73,500 lbs. 10/20 sand on 10-31-85. The well cleaned up in less than 8 hours with absolutely no show of water in the gas. On November 5, 1985 the well tested for 1599 MCF/D with absolutely no water being produced.

We respectfully request an administrative exception to Rule #107 which states that all wells with casing larger than 2-7/8" be tubed, for the below listed reasons:

1. The flow characteristics of this well are very stable. Measurement is easily obtained.
2. The gas is extremely dry, eliminating the need for fluid lift with tubing.
3. The well was not dual completed.
4. No known corrosive or pressure problems exist.
5. The well is not a wildcat.
6. No waste will be created.

Your consideration in approving the Salazar #13 for a tubingless completion is appreciated.

Yours truly,

A handwritten signature in cursive script that reads "Joe Elledge".
