Re: Injection Pressure Increase *IPI-333*
J. L. Reed No. 3
Lea County, New Mexico
PKH40909850397

Dear Sir:

Reference is made to your request of February 25, 1986 to increase the surface injection pressure on you J. L. Reed No. 3 SWD Well. This request is based on a step rate test conducted on the well on February 19, 1986. The results of the test have been received by my staff and we feel an increase in injection pressure on this well is justified at this time.

You are therefore authorized to increase your surface injection pressure on the following well.

Well & Location

J. L. Reed No. 3
Section 35, T-13S, R-37E,
Lea County, New Mexico

Maximum Injection
Surface Pressure

1800 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or it is endangering any fresh water aquifers.

Sincerely,

R. L. Stamets
Director
