Attention: Victor J. Sirgo

*RE: Injection Pressure Increase
W. Dollarhide Queen Sand Unit
Lea County, New Mexico*

Dear Mr. Sirgo:

Reference is made to your request dated October 24, 1989, to increase the surface injection pressure on nine wells within the West Dollarhide Queen Sand Unit Waterflood Project. This request is based on step rate tests conducted on these wells during October, 1989. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the wells shown on Exhibit "A" attached hereto.

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay
Director
