*RE: Injection Pressure Increase
State "HS" Well No. 2
Lea County, New Mexico*

Dear Sir:

Reference is made to your request received August 2, 1990, to increase the surface injection pressure on the State "HS" Well No. 2. This request is based on a step rate test conducted on the well on June 26, 1990. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well.

<u>WELL AND LOCATION</u>	<u>MAXIMUM INJECTION SURFACE PRESSURE</u>
State "HS" Well No. 2 Unit L, Section 9, T-18 South, R-34 East, NMPM, Lea County, New Mexico.	1360 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay
Director
