RE: Injection Pressure Increase
Shell "15" Federal No. 3
Chaves County, New Mexico

Dear Mr. Lee:

Reference is made to your request dated August 24, 1990, to increase the surface injection pressure on the Shell "15" Federal Well No. 3. This request is based on a step rate test conducted on the well on August 20, 1990. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well.

WELL AND LOCATION

MAXIMUM INJECTION
SURFACE PRESSURE

Shell "15" Federal Well No. 3
Unit E, Section 15, T-15 South,
R-29 East, Chaves County.

770 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. LeMay
Director
