RE: NMOCD Correspondence Reference No. SD-06-15: Monument-Tubb Pool (47090) development within Chevron U.S.A., Inc.'s ("Chevron") existing 80-acre standard lay-down oil spacing and proration unit comprising the S/2 SW/4 (Units M and N) of Section 35, Township 19 South, Range 37 East, NMPM, Lea County, New Mexico.

Dear Mr. Okpattah:

Reference is made to the following: (i) your letter dated May 4, 2006 (*Division administrative reference No. pTDS0-613231188*); and (ii) the records of the New Mexico Oil Conservation Division ("Division"), including the file on a previously denied (letter of denial dated April 24, 2006) Chevron application (*see Division administrative reference pTDS0-610430407*).

The rules currently governing spacing, well locations, gas/oil ratio limitation, and allowables for the Monument-Tubb Pool include, but not necessarily limited to:

- (a) Division Order No. R-2800, issued in Case No. 3123 on November 10, 1964;
- (b) Division Order No. R-10128, issued in Case No. 10984 on June 3, 1994; and
- (c) Division Rule 505.A.

It is the Division's understanding that oil and casinghead gas production attributed to the Monument-Tubb Pool within this 80-acre unit is to be simultaneously dedicated to the following two described Chevron U.S.A., Inc. operated wells:

- (1) Jayhawk Well No. 1 (*API No. 30-025-34329*), which is this unit's original well (spud date: March 13, 1998) located at a standard oil well location 330 feet from the South and West lines (Unit M) of Section 35; and.

Chevron U.S.A., Inc.

NMOCD Correspondence Reference No. SD-06-15

- (2) Jayhawk "35" State Well No. 4 to be drilled and completed at a standard Monument-Tubb oil well location 990 feet from the South line and 1650 feet from the West line (Unit N) of Section 35.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael E. Stogner", written in a cursive style with a long horizontal flourish extending to the right.

Michael E. Stogner
Staff Engineer
