**Subject:** Aministrative DHC orders

I find some errors on these DHC orders:

Jicarilla 150 #12 API # 30-039-23519 previously had a DHC-2535 for MV&GAL: Now I received another order for this same well with a different DHC-2687, they are adding the Chacra, so isn't suppose to be an amened order using the same DHC-2535?

Jicarilla 150 #1E API #30-039-23519 previously had a DHC-2540 for MV/GAL/DAK: Now adding Chacra with a different DHC-2686. The same question as the #12.

DHC-2669 – Huerfano Unit #106, has wrong API number, you show 30-045-24102, correct API # for this well is 30-045-06131.

San Juan 27-5 Unit #64A – Same well has two different DHC order numbers. Received one 8/11/99 with DHC-2046. Received another one on 2-9-2000 with DHC-2621?

These other wells are minor errors as wrong pool, etc. I don't know if operator is making mistakes on these:

DHC-2603: Titt #2A 30-045-22914, correct well name is FJ Titt #2A and Aztec Pictured Cliffs, not Blanco as you have it. <sup>71280</sup>

DHC-2611: Jicarilla E #8 30-039-20080, Township is 27N, not 26N as you have it. <sup>26N 27N</sup>

DHC-2615: Randleman #1A 30-045-23385, Blanco Pictured Cliffs, not Aztec PC as you have it.

DHC-2608: WF Federal 34 #2 30-045-29882, Harper Hill Fruitland Sand PC, not Twin Mounds as you have it.

Thanks,
