Latitude N 33.67434° Longitude W 103.29154°

**NATURE OF RELEASE**

Type of Release: Produced Water	Volume of Release: Unknown	Volume Recovered: None
Source of Release: Broken Water Line	Date and Hour of Occurrence: Unknown	Date and Hour of Discovery: Discovered by BLM
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? BLM discovered during a routine inspection and notified NMOCD, Read & Stevens and Latigo. Latigo was recently acquired by Pogo Producing Company.	
By Whom? BLM, J.R Hogwood	Date and Hour: Unknown	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.\*  
This production was recently acquired by Pogo Producing Company. This is apparently an historic spill location. The spill area is located approximately 1,800' west of the Todd #1 tank battery. The spill was found by the landowner, who notified the Bureau of Land Management (BLM). According to the BLM, the line appeared to be disconnected or broken, and the majority of the spill appeared to be produced water. At the spill area, the line ran east and south. The line was traced to the east to a Read and Stevens tank battery. The line extends south towards a Pogo water handling facility.

Describe Area Affected and Cleanup Action Taken.\*  
The area around the broken line was barren. Highlander Environmental Corp. sampled the spill area with a hand auger and was unable to delineate the vertical extent of chloride impact. Work Plan will be prepared for further delineation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
