Re: Albright #7
NWSW, Section 22, T-29-N, R-10-W
30-045-07993

Gentlemen:

The above referenced well is a Chacra/Mesaverde/Dakota commingle. Attached is a copy of the allocation for the commingling of the subject well completed on April 1, 2002. DHC-2965 was issued for this well.

Gas:	Dakota	26%
	Mesaverde	38%
	Chacra	36%
Oil:	Dakota	31%
	Mesaverde	36%
	Chacra	33%

These percentages are based upon reserves assigned to each formation founded on production from the respective formations before and after workover operations and separator tests completed on the Chacra and Mesaverde formations. Since condensate production increased significantly with the addition of the Chacra and Mesaverde formations, condensate was allocated based on pre-work and post-work rates. Please let me know if you have any questions.

Sincerely,

Peggy Cole
Regulatory Supervisor
