May 13, 1957

Mr. A. L. Porter
Secretary and Director
Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Mr. Porter:

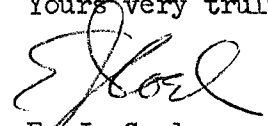

This is a request for administrative approval for an unorthodox location in the Aztec Extension Pictured Cliffs Pool.

SE 1/4 NW 1/4
The well, our Michener No. 1-B, is to be located 2113 feet from the North line and 1884 feet from the ~~East~~^{West} line of Section 33, Township 28 North, Range 9 West, N.M.P.M., San Juan County, New Mexico. The NW/4 of Section 33 is dedicated to the Pictured Cliffs formation. Most of the area of Section 31 is covered by steep bluffs and a high mesa, making it necessary to put the location unorthodox so that the location may be made on level and accessible ground.

El Paso Natural Gas Company holds the lease in the SW/4, NE/4, and SE/4 of Section 33, Township 28 North, Range 9 West, therefore approval of other operators has not been sought.

I am enclosing two copies of the Certified Well Location Plat and two copies of our Intention to Drill.

Yours very truly,

E. J. Coel
Senior Petroleum Engineer

EJC/gks

(Range)N.M.P.M.
(Meridian)Aztec P.C. Ext.
(Field)San Juan
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is 6879 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well thru the Pictured Cliffs formation using rotary tools and to perforate and water fracture possible producing zones. Estimated Total Depth 3075'.

Casing Program:

9-5/8" at 120' with 125 sacks regular cement circulated to surface.

5-1/2" at 3075' with 75 sacks regular cement, 75 sacks Pozmix.

The NW/4 of Section 33 is dedicated to this well.

NW/4 SF 077107-C.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
