Re: Request for Administrative Approval
of Unorthodox Well Location in the
Totah-Gallup Oil Pool for Aztec-
Hagood #6-G as an Exception to Rule
104(c)

Dear Mr. Porter:

Pursuant to Rule 104(f), Aztec Oil & Gas Company hereby submits, in triplicate, its application for administrative approval of an exception to the well location regulations set forth in Rule 104(c).

In support of this application, Applicant respectfully states and shows the following:

1. The proposed unorthodox drilling location has been staked one thousand and thirty-five feet (1,035') from the North line and one thousand and one hundred and fifteen feet (1,115') from the West line of Section 34, T-29-N, R-13-W, N.M.P.M., and this unorthodox location is necessitated by topographical conditions.

2. The ownership of all oil and gas leases within a radius of 790 feet of the proposed location is common with the ownership of the oil and gas leases under the proposed location, Applicant holding the entire section under lease.

3. Applicant intends to drill a well on the unorthodox drilling location to be known as the Hagood No. 6-G to an approximate depth of five thousand six hundred and fifty feet (5,650') and expects to complete it as an oil producer.

Mr. A. L. Porter

-2-

September 13, 1960

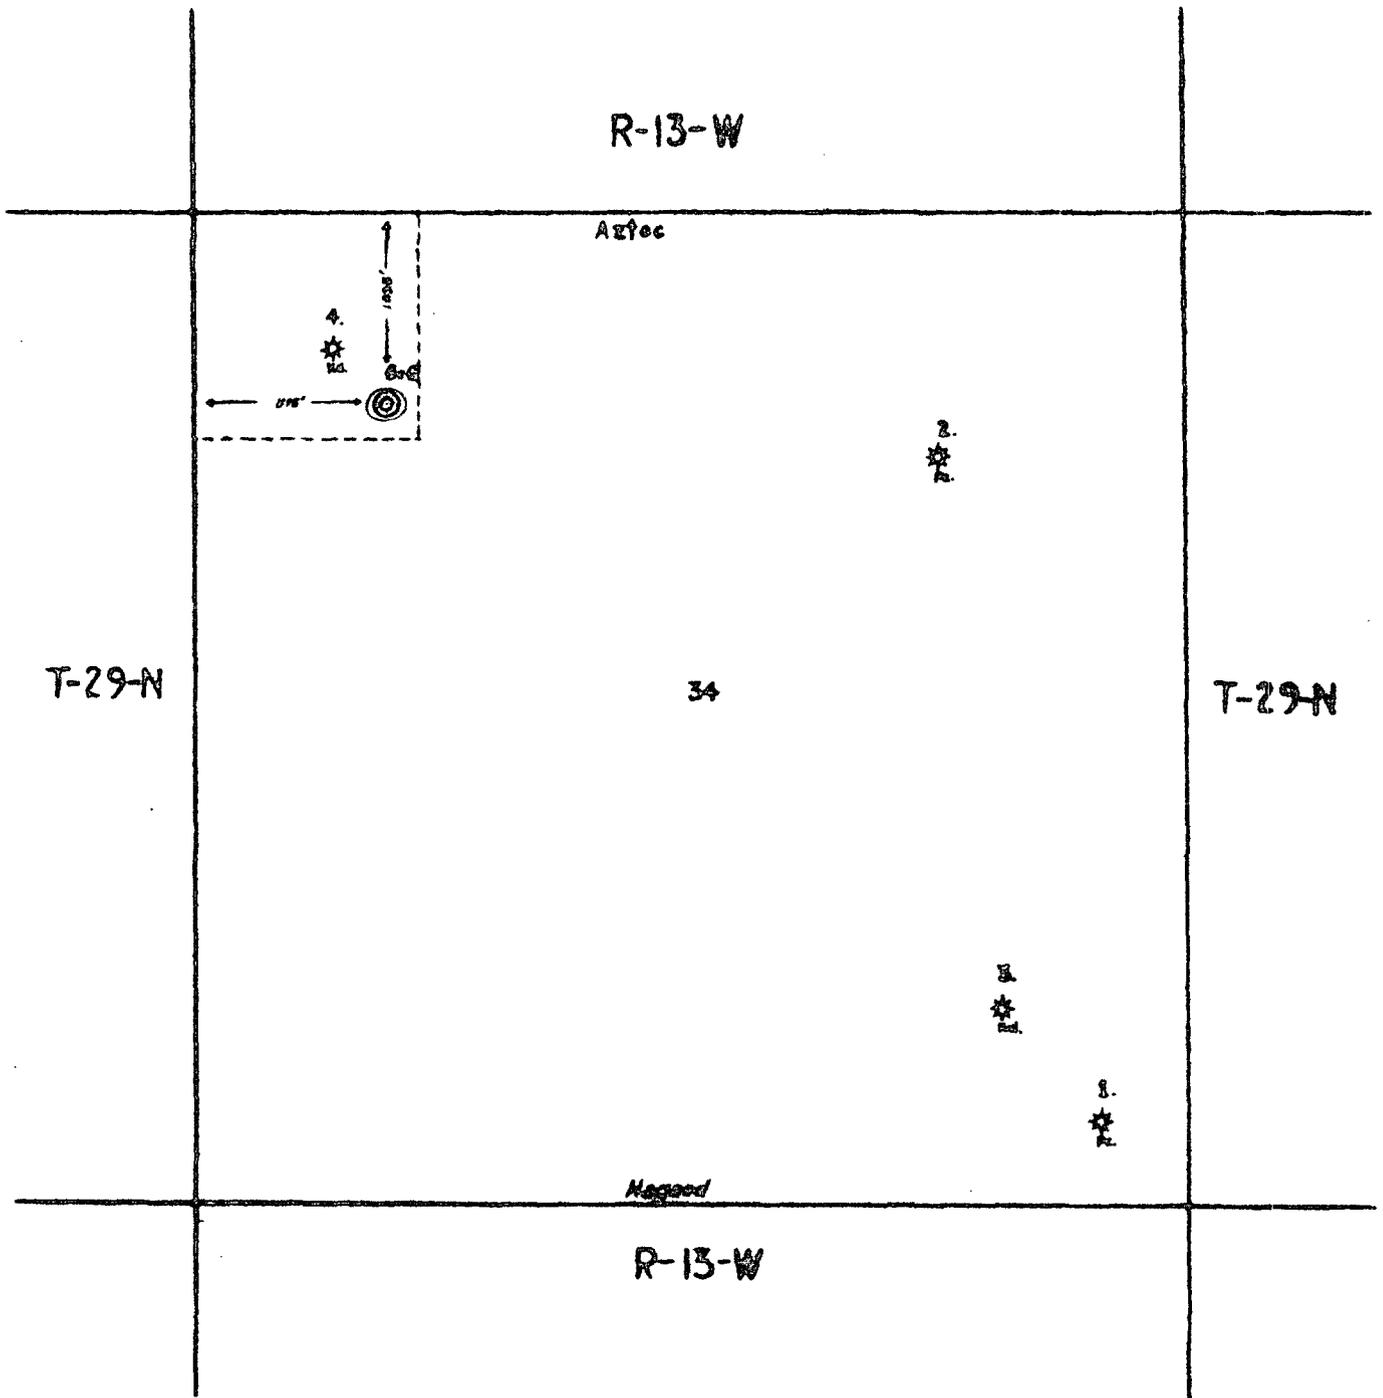

Applicant respectfully requests that the Secretary-Director of the Commission, by administrative approval, grant exception, as above provided, without notice and hearing, approving the unorthodox drilling location set forth above.

Yours very truly,

AZTEC OIL & GAS COMPANY

Re: Non-standard location, Aztec Oil
and Gas Company #6 Hagood "G".
D-34-29N-13W; 1035/N, 1115/W

Dear Sir:

We received an informal request to inspect subject location.

They have a Dakota well located 990/N and 990/W in this section.
The proposed well is projected to the Gallup formation.

I have visited the location and find that a standard location would
be very expensive to build because of topographical conditions.
Therefore, I recommend approval of the subject location upon proper
application by the operator.

Yours very truly
