Re: Sulimar Queen Unit
Chaves County, New Mexico
Proposed TRACT I-11 well

Gentlemen:

We propose to drill the captioned test well 1370' from the West line and 2615' from the South line of Section 24, Township 15 South, Range 29 East. This well will be drilled to a depth sufficient to test the Queen Sand at an approximate depth of 2025'. If production is not present, we plan to utilize this test as a water injection well.

This letter is to request permission for this unorthodox location. Administrative Approval to expand operations has been obtained by Order No. R-4290.

Enclosed is information required under Rule 701. In the event we need to use this test as a water injection well you will be forwarded additional information as required, such as a log and schematic sketch of proposed injection well.

Very truly yours,

Lois Taylor
