Type of Release Crude Oil	Volume of Release 9 bbls	Volume Recovered 0
Source of Release 1" valve on floeline	Date and Hour of Occurrence 11/02/06	Date and Hour of Discovery 11/06/06 7:30
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom? NA	
By Whom? NA	Date and Hour NA	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. NA	
If a Watercourse was Impacted, Describe Fully.* NA		

**Describe Cause of Problem and Remedial Action Taken.\***

Valve handles left on valves. Valve was possibly opened by cattle due to cattle tracks around well. All valves were sealed closed.

**Describe Area Affected and Cleanup Action Taken.\***

Affected area consisted of 38,250 square feet of spray area, vegetation and well pad. No remediation planned at this time as per Landowner request. Landowner expressed concern about more damages occurring if remediated artificially. No fluid was recovered and no fluid was standing. Affected area had surface spray only. Contaminated caliche will be removed and replaced.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
