NATURE OF RELEASE

Type of Release Crude oil and produced water	Volume of Release < 1 Bbl Produced fluid	Volume Recovered None
Source of Release Flow line flange at well	Date and Hour of Occurrence 12/09/2006 10:45 PM	Date and Hour of Discovery 12/09/2006 10:45 PM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Gary Wink	
By Whom? Steven M. Bishop	Date and Hour 12/10/2006 12:17 AM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse N/A	

If a Watercourse was Impacted, Describe Fully. *N/A

Describe Cause of Problem and Remedial Action Taken.*
North Hobbs Unit #32-411, flow line flange at well site, flange gasket broke causing spray on location. There was very minimal spray and all spray stayed on location of well. A CO2 cloud was produced and Hobbs Police and Fire Departments responded and closed Sanger street from West County road to French Drive for a short time. The well was shut down and valves were closed to eliminate escaping CO2. No reportable quantities with exception of the over 50 mcf of CO2 were reached during this event. This C-141 is being sent for information purposes only due to the response of the city. As of 12/12/2006 the location has been cleaned and no further work is planned for this location.

Describe Area Affected and Cleanup Action Taken.*
The only area affected by this spill was the well location. The location had a light spray of produced fluid to the north and west of the wellhead. The affected area was scraped via backhoe and new soil was put around wellhead. The wellhead and fence to the north of the well was steamed off. The flange gasket was replaced and the well was returned to service. No further work is planned for this site.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
