If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Casing Valve failed, causing oil to leak on location, vacuum truck picked up free oil, and area will be cleaned and remediate in place.

Describe Area Affected and Cleanup Action Taken.\*  
Area to be remediated is the well pad, and will be treated w/ Micro Blaze, and the cover with nitrate, and worked in to the soil, testing will be conducted, and when levels are down to OCD levels, a closure will be submitted. Ranking is distance to ground water, -0, wellhead protection area-0, distance to surface water-0.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
