Was a Watercourse Reached?	☐ Yes ☒ No	If YES, Volume Impacting the Watercourse.	NA		

a Watercourse was Impacted, Describe Fully.*

NA

Describe Cause of Problem and Remedial Action Taken.*

Operator discovered oil coming out of conduit manhole that runs under the Railroad Tracks. Upon discovery the operator shut in all of the wells with lines that run through this conduit and opened them one at a time until he determined which line had the leak. The site will be delineated to determine necessary remediation requirements.

Describe Area Affected and Cleanup Action Taken.*

The affected area is 27' X 45' and has been fenced off until remediation can take place. A vacuum truck was used to pickup the free standing fluids.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCDD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCDD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCDD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
