RE: Non-Standard Location
Midnight Matador "A" #3
1,500' FNL and 2,290' FEL
Section 35-T17S-R27E
Red Lake Field, Eddy County
Federal Lease No. LC-055561

Dear Mr. Brooks:

Fairway Resources requests approval for a non-standard location for the Midnight Matador "A" #3. The problem that we have encountered is we are too close to the northern spacing unit line. Both spacing units are in the same Federal lease and all of the royalty overriding and other interests are common. Fairway owns 100% of the working interest in this lease. Therefore, no parties are negatively affected. I am enclosing the following:

- Fairway Resources Operating, LLC Lease plat
- Fairway Producing Formations per Lease Plat
- Copy of the Well Location and Acreage Dedication Plat
- Administrative Application Checklist

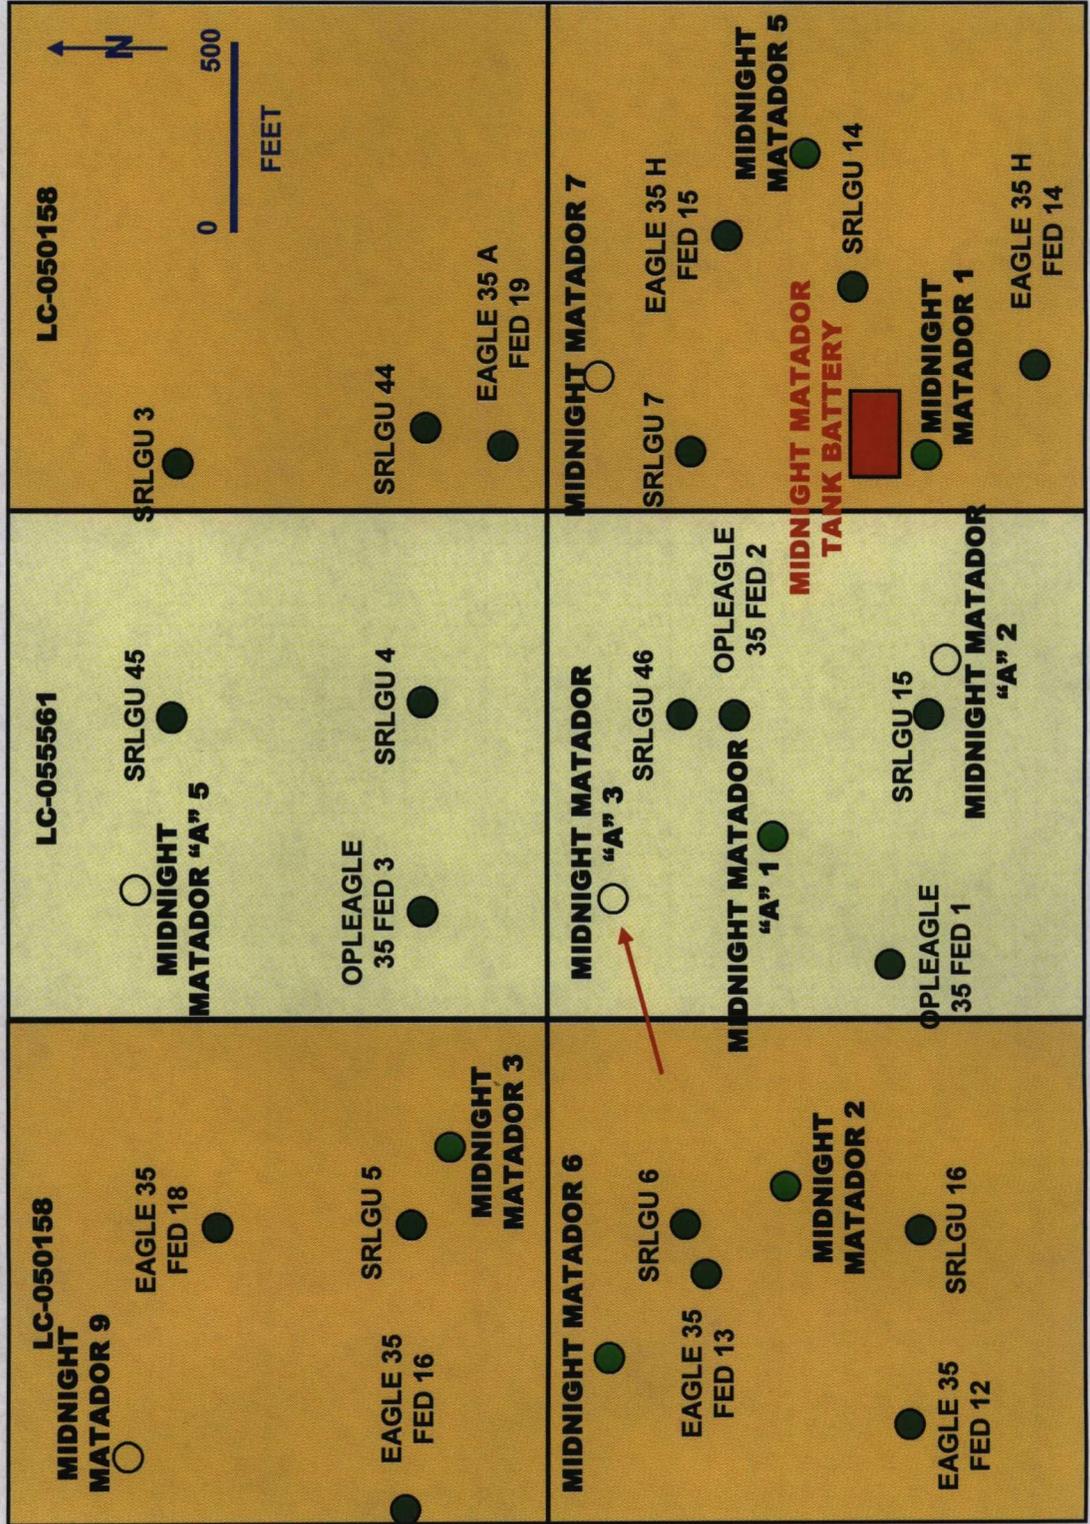

We are requesting that you approve this location for the further development of resources of the Red Lake Queen-Grayburg San Andres. If you have any further questions, please do not hesitate to call me at 817-416-1946.

Sincerely yours,

Kenneth Pearce
Senior Operations Engineer

To: Catanach, David, EMNRD
Subject: RE: Midnight Matador "A" No. 3
Attachments: MMA 3 NSL.pdf

David,

The reason we want to drill the Midnight Matador A #3 at an unorthodox location is to more efficiently develop the San Andres reserves beneath our operated acreage. Attached is a plat of our other San Andres wells offsetting the proposed location for the Midnight Matador A #3 (the Midnight Matador A #4 is actually a deepening project that is currently underway). I have indicated 330' radii drainage circles on the plat that show why we need to move the proposed location to the north.

I hope this information is what you need, if not, please let me know.

Thanks,

Kenneth Pearce

Subject: Midnight Matador "A" No. 3

Hi Kenneth,

I am currently reviewing your application for a non-standard well location for the Midnight Matador "A" Well No. 3. Please be advised that Division Rule 19.15.3.104(F) requires the applicant to submit evidence as to why the unorthodox location is necessary. Your application contains no such evidence, nor does the application even state why the well needs to be drilled at that location. In order to process this application, you will need to submit this information. If the location is based upon geologic considerations, geologic evidence will be required. If the location is based upon topographic considerations, a topo map showing the surface obstruction will be required.

If you need additional information, please E-mail me or phone me at (505) 476-3466.
