Rule 104 F
For State "CV" No. 2Y
To be on same 40-acre unit with #2 located...
(E) 8-21-80

Gentlemen:

Amoco Production Company requests approval to produce our State "CV" Well No. 2Y on a 40 acre proration unit with our State "CV" Well No. 2. Currently State "CV" Well No. 2, located 1750' FNL and 330' FWL, Section 25, T-17-S, R-35-E, Lea County, New Mexico, is producing from the Vacuum Abo Reef pool at a rate of 20 bbls oil, 7 bbls water, and 51 MCF per day. Our State "CV" Well No. 2Y, located 1960' FNL and 540' FWL, Section 25, T-17-S, R-35-E, Lea County, New Mexico is perforated in the Vacuum Abo Reef and is currently shut-in.

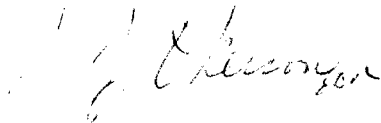

State "CV" Well No. 2Y was shut-in due to parafin buildup and at that time we returned to producing State "CV" Well No. 2. The NMOCD, Hobbs, requested that cement be circulated on the long string in the State "CV" Well No. 2Y in order to stop a salt water flow from the intermediate casing. While completing the requested cement work the decision was made to attempt to restore State "CV" Well No. 2Y to production capability. State "CV" Well No. 2Y was subsequently acid fraced with the use of a zylene solution to clear up the parafin problem. Approximately 14 bbls oil were swabbed in a two day period following the completion of the acid job.
