Re: Order No. 5353
Rule No. 2

Gentlemen:

The Tom L. Ingram No. ~~20~~^{No 2Y} Federal "N" was drilled and completed as a small San Andres oil producer at a location 846' FSL and 710' FEL of Section 23, T-8-S, R-37-E in Roosevelt County, New Mexico. Rule No. 2 of the above captioned order specifies within 150' of the center of the quarter-quarter section. The subject location is 186'. This location was a twin to the junked hole located 846' FSL and 660' FEL (old location plat indicated 660' FSL & 660' FEL). Upon having the new hole surveyed, it was learned that the original description of the old hole was in error. Sand dunes on the south would have prevented using the standard location.

For these reasons, it is requested that administrative approval be granted this non-standard location.

Not to cloud the picture, but the Order applied to P₂ production and this well produces from P₁. The produced waters from each are different.

Very truly yours,

TOM L. INGRAM

Re: Application for Non-Standard
Location: Federal N No. 2Y
Sec. 23, T-8-S, R-37-E
Roosevelt County

We may not process the subject application for non-standard location until the required information or plats checked below (is)(are) submitted.

A plat must be submitted clearly showing the ownership of the offsetting leases.

A statement must be submitted that offset owners have been notified of the application by certified mail.

A plat must be submitted fully identifying the topography necessitating the non-standard location.
