Subject: Mesa Petroleum Co.
Roach State #1
608' FSL & 1430' FWL (Amended)
Section 16, T6S, R22E
Chaves County, New Mexico

Dear Mr. Ramey:

Application is hereby made for administrative approval of an unorthodox location for subject well due to topography.

This well has been issued an approved Application to Drill for a location at 660' FSL & 660' FWL but when construction activities were commenced, it was discovered that considerable blasting would be required to level the location. Such activity could have an adverse affect upon the J.M. McNight water wells associated with the ranch house in the proximity of this location. Authorization to continue construction activities at the amended location is requested with the understanding that no allowable will be issued until all requirements have been met.

Exhibit I is the topographic plat showing the original location and the proposed amended location, Exhibit II is a survey plat showing mineral ownership, and Exhibit III is a land plat showing mineral owners, offset operators and lease holders of record notified by certified mail of this request. Please note that adjacent Federal leases have not yet been issued to Elaine Wolf.

Expeditious handling of this request is greatly appreciated.

Yours truly,
Mesa Petroleum Co.
