Dear Mr. Ramey:

Stevens Operating Corporation has been advised by Mesa Petroleum Corporation of their Application for an Unorthodox Location for their Haley Com. #3, based on topography.

Stevens objects to this unorthodox location because field examination of the proration unit shows that drilling locations could be built on the NW/4NE/4, SE/4NE/4, and SW/4NE/4.

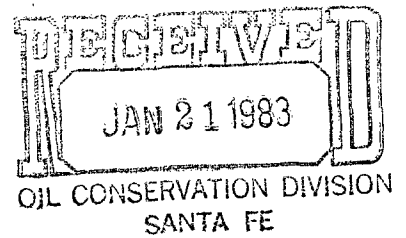

Yours very truly,

STEVENS OPERATING CORP.

Dear Mr. Stamets:

Subject: Unorthodox Location
Haley Com #3
532' FNL & 453' FEL
Sec 12, T7S, R22E
Chaves County, New Mexico

It is hereby requested that Administrative Approval for an unorthodox location for subject well be reconsidered due to the economic constraints of drilling at the 990' FNL & 990' FEL location suggested by your district field personnel (copy of letter attached). Comparative bids were solicited and are hereby attached showing that the orthodox location would cost from \$37,000 to \$49,000 to build versus \$10,000 to \$15,000 for the subject location.

It should further be noted that the surface lessee, Mr. Bronson Corn, is strongly opposed to the 990' FN & EL location due to the obstruction to drainage that would be caused by building the location in the middle of the draw, an area subject to spring washouts and flooding.

If you are unable to grant this request administratively, please schedule this application for the first available hearing date.

Thank you for your consideration of this request.

Sincerely,

Dear Mr. Mathis:

Our district field personnel have checked the above location and it is their opinion that there is a legal location at a point 990' FNL and 990' FEL in this 40-acre proration unit. Therefore, we cannot approve this application administratively.

If you want this application set for hearing, please let me know.
