Undesignated Morrow

Gentlemen:

Holly Energy Inc. requests administrative approval of the unorthodox location for the subject well under the provisions of Division Rule 104-F.

Said well was drilled as a wildcat Devonian oil well on a standard oil well location by Franklin, Aston & Fair in 1974. It was drilled to a total depth of 10,268 feet and was dry in the Devonian. It was plugged back to 9764 feet to test the Mississippi with 4½" casing set @ 9764'. After trying the Mississippi, it was plugged back to the Morrow, with perforations @ 9138-9148, with the East ½ of Section 35 dedicated to well. Said well has been shut in since December of 1974, waiting on a pipeline and has just recently been hooked up.

A lease ownership plat is enclosed. Each offset operator is being notified by three copies of this letter (via certified mail) and is asked to indicate waiver of objection by authorized signature and are also asked to mail one copy of this letter to New Mexico Energy and Minerals Department, P.O. Box 2088 Santa Fe, New Mexico 87501, and return the other copy to Robert Loyd, Holly Energy Inc., P.O. Box 726, Artesia, New Mexico 88210 in the stamped, self-addressed envelopes enclosed.
