Gentlemen:

This letter is being written as an application for exemption of Rule 104 for an unorthodox location. The well is Well #2 in the El Poso Ranch. This well has been accepted as an unorthodox location but was stipulated as being drilled to the Dakota formation. The well, however, was only drilled to the Gallup.

Therefore, an additional request is being made for exemption of Rule 104 for an unorthodox location on Well #2, in the Gallup formation. The reason for this unorthodox location is that the topography of the area makes it impossible to drill a standard well.

Thank you and please forward any paperwork to my attention.

Best Regards,

Matthew J. Burgess

Re: Non-Standard Location
TEXAS ROSE PETROLEUM, INC.
No. 2 El Poso Ranch
Unit N, Sec. 14, T. 28N., R. 1E. (Projected Survey)

Gentlemen:

Texas Rose Petroleum, Inc. is an Out-of-State corporation, without prior experience in drilling in New Mexico. Referenced well was inadvertently drilled by Texas Rose Petroleum, Inc., with the understanding that the well had been permitted by the previous owner of the fee oil and gas lease. In order to correct this deficiency, the operator has engaged me to obtain record approval for drilling of the well.

Attached are copies of C-101 and C-102 which I have filed with your Aztec Office. As indicated by the C-102, the well is located 222' from a subdivision line, instead of the minimum 330'. The well was drilled at a non-standard location because of the rugged terrain.

It is respectfully requested that administration approval be granted for an exception to Rule 104(B) for topographic reason. Also attached is a contour map indicating the extreme topography where the standard location should be and a map indicating that all offset drilling units are under lease to Texas Rose Petroleum, Inc.

Reports advising of subsequent operations will be filed as soon as possible. Your assistance in correcting this deficiency is greatly appreciated.

Sincerely yours,
