Infill Application

Gentlemen:

We are in the process of filing Forms 9331-C and C-102 with the Bureau of Land Management for permission to drill our newly proposed Wells Federal No. 19 as a Jalmat (Gas) well at a non-standard Jalmat (Gas) location consisting of 660' FSL and 2310' FEL (O) Section 4, T-25-S, R-37-E, Lea County, New Mexico. The enclosed sketch of the entire E/2 Section 4 shows various topographical irregularities and surface obstructions which prevent locating the well at a standard gas location.

We also propose to simultaneously dedicate our proposed Wells Federal No. 19 along with the previously existing Wells Federal No. 2, located 1980 FNL & 1980 FEL (G) Section 4 to the non-standard Jalmat (Gas) proration unit consisting of W/2 E/2 Section 4, T-25-S, R-37-E (NSP-308).

Furthermore, if the proposed well is completed as a commercial producer and in compliance with the Natural Gas Policy Act of 1978, an application will be submitted to the New Mexico Oil Conservation Division to obtain administrative approval for the well as a Section 103 infill well.

Three copies of a land map showing the location of the original Jalmat (Gas) well on the existing 160-acre proration unit plus the proposed location of our Wells Federal No. 19 are enclosed.

Complete copies of this application have been sent by certified mail to all offsetting parties owning Jalmat (Gas) rights. The following is a list of the offsetting Jalmat (Gas) owners:
