RE: Non-Standard Location
Isaiah 'BBA' St #1
Township 9 South, Range 32 East
Section 14: 330' FSL & 330' FWL
Lea County, New Mexico

OIL CONSERVATION DIV
02 SEP - 9 PM 1:49

Dear Mr. Stogner:

Yates Petroleum Corporation hereby requests administrative approval for a non-standard location for a Wildcat Mississippian gas well.

This wellbore was drilled in 1985 by Spence Energy Company to a total depth of 11,115' to test the Devonian formation and was P&A'd in May of 1987.

Yates' plan is to re-enter this wellbore with a pulling unit, clean out the existing hole, repair the 5½" casing and attempt a completion in the Austin Cycle.

Yates concludes that it makes more sense economically to re-enter this existing wellbore than it would be to drill a new well and would therefore be in the best interest of conservation.

Notification to the offset operator and unleased mineral owners to the south and west was made by certified mail on September 4, 2002, including a copy of this application letter with all attachments.

Enclosed are Forms C-101, C-102, land plat and notification list of offset operators including letters of waiver.

Please call me at (505) 748-4351 if you need any additional information.

Thank you.

Very truly yours,

YATES PETROLEUM CORPORATION

Robert Bullock
Landman

Section 14-T9S-R32E

Lea County, New Mexico

Lease VO-6117

Yates' plan is to re-enter this well bore with a pulling unit and a reverse unit to drill out the cement plugs in the 8 5/8" casing and the 7 7/8" open hole to the top of the 5 1/2" casing stub as it was cut off at 3827'. The 5 1/2" casing will be repaired and tied back to surface and cemented 250 sacks of cement to bring the top of cement behind the 8 5/8" casing to approximately 2425'. After the casing has been repaired, the plugs in the 5 1/2" casing will be clean out to the plug over the Devonian at 10965'. Then the well will be completed with a pulling unit in the Austin Cycle within the interval 10350' to 10800' (to be determined after logs have been run). The mud program will be 9.2 to 9.5 ppg brine water with viscosity of 55-70 cp. A 5000# BOPE will be nipped up on the 8 5/8" casing.

**RE: Offset Operator Notification
Non-Standard Location
Isaiah "BBA" St #1
Township 9 South, Range 32 East
Section 14: 330' FSL & 330' FWL
Lea County, New Mexico**

Dear Mr. Carter:

Yates Petroleum Corporation plans to re-enter the existing wellbore at the non-standard location described above. This location does not comply with the well spacing requirements set forth in NMOCD Rule 104.C(2)(b)(Revised 8/12/99).

If you have no objections to this non-standard location, please signify your approval by signing one copy of this letter in the space provided below and returning same to our office at the above address. Any objection to this application must be filed in writing with the New Mexico Oil Conservation Division within twenty (20) days from date of receipt of this notice.

The undersigned hereby waives any objection to the non-standard location proposed by Yates Petroleum Corporation.

Very truly yours,

YATES PETROLEUM CORPORATION
