APPLICATION FOR UNORTHODOX WELL LOCATION
SHELL - LIVINGSTON NO. 2
BLINEBRY OIL & GAS POOL
LEA COUNTY, NEW MEXICO

Pursuant to the provisions of NMOCD Rule 104-F, Shell Western E&P Inc. (SWEPI) respectfully requests administrative approval to produce the subject well from the Blinebry Oil and Gas Pool at the nonstandard location given below.

Livingston No. 2 was drilled at an orthodox location in 1950 as a Drinkard producer. The Tubb gas pay was opened in 1957 to initiate dual production with the Drinkard. The well singly produced from the Drinkard after the Tubb was shut-in in 1964. Livingston No. 2 was recompleated to the Blinebry in 1973 following abandonment of the Drinkard. The subject well has been shut-in since July of 1974 after an unsuccessful attempt to recompleate in the Paddock and San Andres zones. The Blinebry zone has recently been reopened in Livingston No. 2 after a cement squeeze of the Paddock and San Andres. Livingston No. 3, a Blinebry/Drinkard producer, is 112' from Livingston No. 2 necessitating an exception to the well location requirements of Rule 104.

The locations for the above referenced wells are as follows:

Livingston No. 2 - Unit Letter W, 660' FSL and 1980' FEL, Section 3, T21S, R37E

Livingston No. 3 - Unit Letter W, 560' FSL and 2030' FEL, Section 3, T21S, R37E

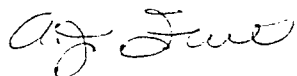

A copy of this application has been sent by certified mail to each offset operator.

Remarks: This well is non-standard in that it is located 112 feet from the Livingston No. 3 well, located 560' FSL & 2030' FEL, Section 3, which is producing from the Blinebry Oil & Gas Pool.
