Re: Unorthodox Location
Whitten #1-C
Section 35, T16S, R38E

Dear Sir:

Please, consider this our request for an administrative approval for an unorthodox location for the captioned well. We re-entered the well with the intent to complete in the Knowles Strawn Pool at a depth of 11,300'. After finding the Strawn unproductive, we decided to drill deeper and, hopefully, complete as a Devonian producer. On October 1, 1987 we sent in the necessary paper work, in order to obtain an allowable, for the well as a Devonian producer. Since we deepened the well to the Devonian and there are special spacing and location rules, our well is now in an unorthodox location. Due to our unorthodox location being based upon topographical conditions, we will appreciate an administrative approval for the well.

Per Oil Conservation Commission requirements, enclosed is two copies of our application accompanied by plats, showing the ownership of all leases offsetting the proration or spacing unit for which the unorthodox location is sought, and also all wells completed thereon. The well is an unorthodox location based upon topographical conditions due to the fact that it was a re-entry. Also, enclosed is a copy of the letter and waiver that was sent to each offset operator by way of certified mail, on this date.

Your consideration in the above mentioned matter is appreciated. Should you need anything further, please, do not hesitate to let me know.

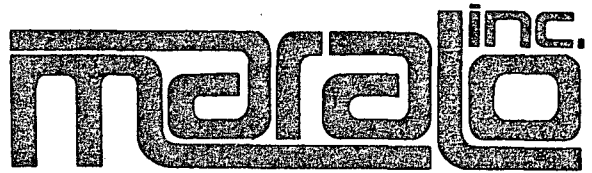

Yours truly,

Brenda Coffman
