Re: State 32-22-6 #14
Sandoval Co., NM.

Gentlemen:

The captioned well was permitted and drilled in 1985. Said well was subsequently completed as a Gallup gas well. Acreage dedication to this well should now be the entire SW/4 of Section 32, T22N-R6W. Since this well is located 770' FSL and 2200' FWL, a 104F exception for 160 acre spacing needs to be made. Please accept this letter as a formal request to:

1. Change the 40 acre (oil) dedication to a 160 acre (gas) dedication, and
2. An exception (104F) to the footage requirements due to the surface location.

A letter stating the acreage dedication and a plat have been sent to all off-set operators asking them to comment directly to your office.

It is my understanding that unless you receive objections from the offset lease holders, there is no requirement for a formal hearing and this exception can be approved administratively.

If there are any questions, please contact the undersigned.

Very truly yours,
