87505

Dear Sir:

Please find attached Form C-107A, production graph, C-102's, and a working interest owner and royalty interest owner list for Unit Petroleum's Nathan Federal Com #2.

After the initial completion in the Morrow formation, Unit plugged back to the Atoka formation. This completion turned out to be marginal, as the well tested at 83 mcf/day and 0 oil. The well was returned to the Morrow formation to maximize production. Neither zone produces any appreciable amount of water and there is no evidence that this would harm either formation. Pressures are similar and no cross flow should exist.

Therefore, Unit respectfully requests permission to commingle the Morrow and Atoka formations. The Atoka formation is currently shut-in behind a packer. Please call me at (918) 493-7700 if you have any questions or need further information.

Sincerely,

Kelly Ryan
District Engineer

KDR/jfj
