RE: Application for Unorthodox (Non-Standard) Location
Fred Pool Drilling, Inc.
Plains State "16" Well #1
(APD approved 12-27-88 pending NSL approval)

Gentlemen,

Fred Pool Drilling, Inc. hereby applies for an Unorthodox Location
for the above referenced well on the basis of geologic conditions.

Enclosed you will find relevant geologic maps and a geologic discussion
of the conditions which result in the necessity of the unorthodox
location.

The offsetting operators have been notified of this application by
certified mail.

Thank you for your consideration of this matter, if I may be of
assistance, please advise.

Sincerely

A handwritten signature in dark ink, appearing to read "Fred F. Pool, III", with a stylized flourish at the end.

Fred F. Pool, III
Engineer

Re: Plains State 16-#1
1250 FNL & 2310 FE1
Sec. 16-T11S-R28E
Chaves Co., N.M.

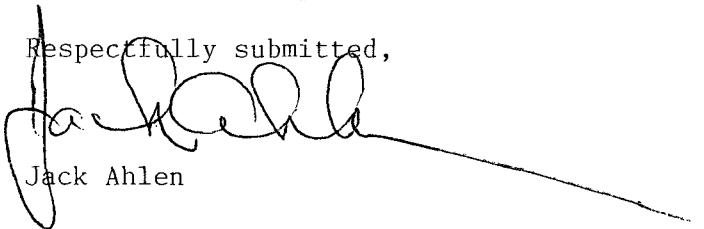

Dear Mr. Pool:

I recommend you drill a Fusselman dolomite test to approximately 7200' at the location indicated above and on the attached subsurface geological maps.

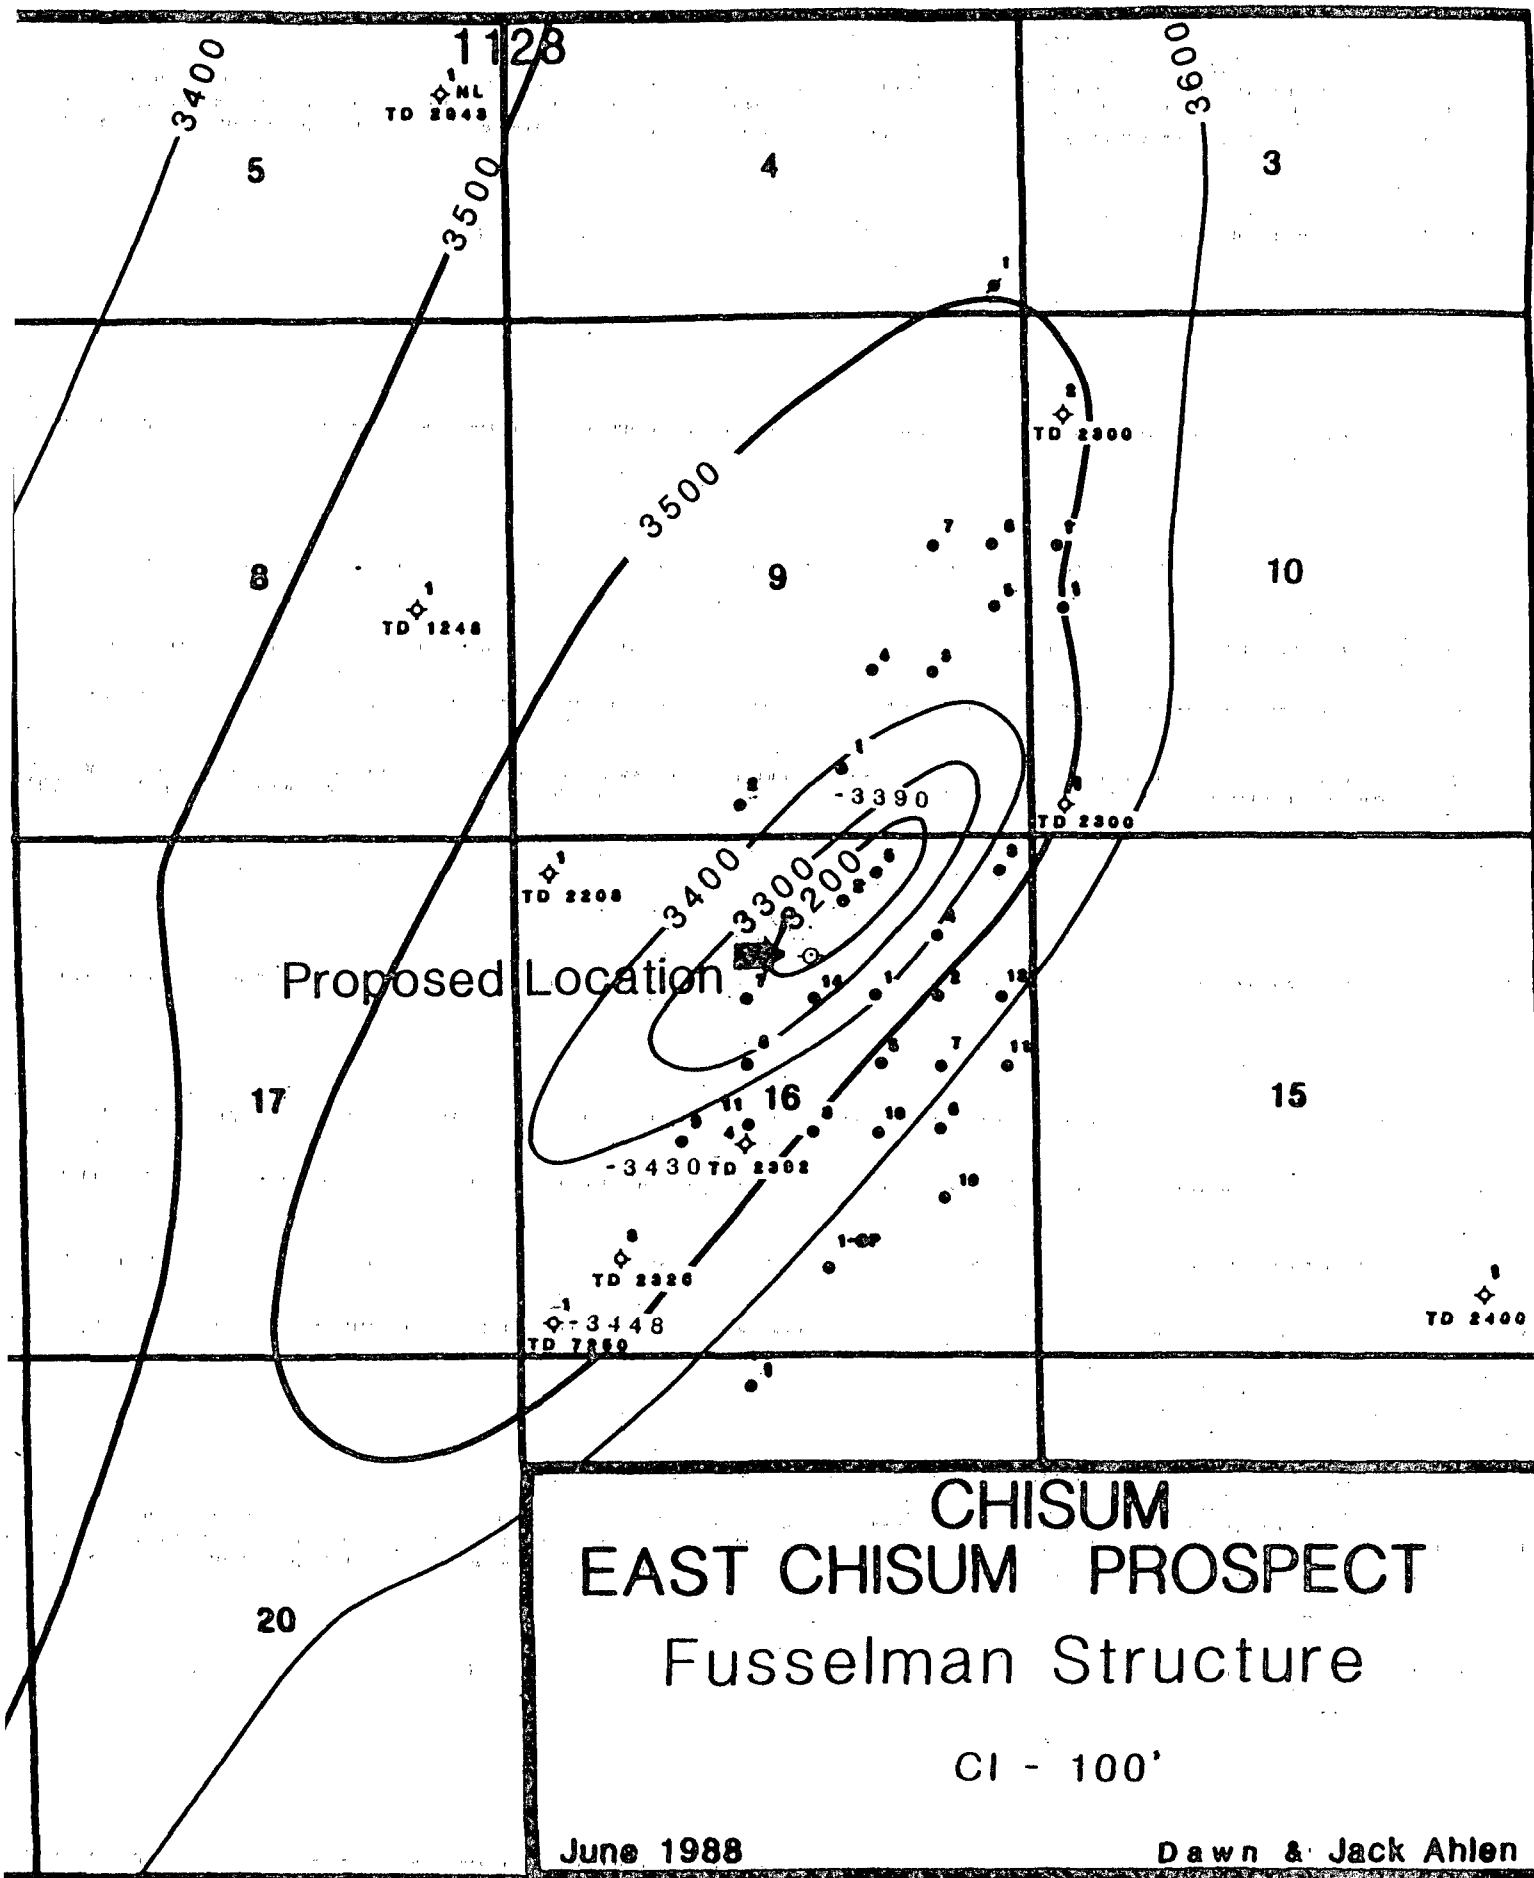

The Fusselman formation produces from anticlinal traps. The attached map of the San Andres marker indicates a well controlled shallow anticline located at the proposed well site. Experience in southeast New Mexico suggests that Fusselman structures are located directly below such shallow structures.

The proposed location was chosen at the apex of the projected deep structure since other near by deep tests drilled on the basis of seismic data have failed.

Respectfully submitted,

Jack Ahlen
