Re: Application for Non-Standard Location
Evergreen Operating Corporation
Rosa Unit #311
1400' FNL 595' FEL Sec. 28-T31N-R4W
Basin Fruitland Coal Gas Pool
Rio Arriba County, New Mexico

Gentlemen:

We, on behalf of Evergreen Operating Corporation, hereby make application for approval of the location of the Rosa Unit #311 well to be located 1400 FNL 595' FEL of Section 28, Township 31 North, Range 4 West, Basin Fruitland Coal Gas Pool, Rio Arriba County, New Mexico.

The reason for the non-standard location is that there is not sufficient room to locate the well on the pad with the Rosa Unit #87, and there is no other location in the east half of Section 28 for a well pad.

This location is located on privately owned surface, and is adjacent to the location of the Rosa Unit #87 well.

We believe that directional drilling should not be required because:

1. We may have to use a beam pump and rods to lift water from the wellbore,
2. We are spotting the wells as nearly "on pattern" as we can, limited by the topography, archaeological concentrations, animal habitat and tree concentrations in the forest.
3. The distances between wells is within the footage parameters required by Order R-8759.

The attached exhibits show the situation at the location and surrounding area.

All offset operators and lease owners are being notified by certified mail at this mailing. The Return Receipt Cards will be provided when they are returned.

It is my belief that the information contained in this application is true and correct according to the information available to me.

If further information is needed, please contact me.

Yours very truly,

A. R. Kendrick

ON-SITE FIELD INSPECTION

Evergreen Operating Corporation
Rosa Unit #311
1400' FNL 595' FEL, Sec 28-T31N-R4W
Basin Fruitland Coal Gas Pool
Rio Arriba County, New Mexico

During our supervised On-Site Inspection, we found the following to exist:

The location is on private land within the Carson National Forest.

The U.S. Forest Service could not find a place in Section 28 on Forest land where we could avoid excessive cuts and fills, timber removal, and other ecological damage.

The location utilizes the same access road and is adjacent to the location pad of the existing Rosa Unit #87 well to avoid creating additional aesthetic and environmental damage.

The location does not crowd any drill tract inside or outside of Section 28.

The location is satisfactory to Mr. Phillip Ross, the surface and minerals owner.

Dear Mr. Stogner:

The enclosed Form C-102 shows the amended location for the subject well.

This location move was required by the surface owner.

The location was moved from 1400' FNL 595' FEL to 1430' FNL 645' FEL. The total move was only 58 feet from the location of the original filing.

If further information is needed, please contact me.

Yours very truly,

A. R. Kendrick
