BJ SERVICES COMPANY, USA  
11211 FM 2920  
TOMBALL, TX 77375

**PUBLIC NOTICE**

BJ Services Company, U.S.A. 11211 FM 2920, Tomball, TX 77382, has submitted an application to the New Mexico Energy, Minerals and Natural Resources Department, Oil Conservation Division to renew the discharge plan permit (GW-017) for their Hobbs Chemical Services & Tool Services District located in Section 36, Township 18 South, Range 37 East, NMPM, Lea County, Hobbs, New Mexico. The physical address of the facility is 5514 Carlsbad Highway, Hobbs, NM 88240.

The facility provides services for oil and gas well development and production. Approximately 100-gallons of residual tank clean out, 100-gallons of off-spec chemicals and numerous 55-gallon drums containing various well servicing chemicals will be stored onsite within containment. Groundwater most likely to be affected by a spill or leak is approximately 20 feet in depth, and the total dissolved solids concentration of this aquifer is approximately 300 mg/L.

Any interested person or persons may obtain information, submit comments or request to be placed on a facility-specific mailing list for future notices by contacting Leonard Lowe at the New Mexico OCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3492. The OCD will accept comments and statements of interest regarding the renewal and will create a facility-specific mailing list for persons who wish to receive future notices.

NOTICE OF PUBLICATION

STATE OF NEW MEXICO  
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT  
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(GW-017) BJ Services CO, USA, 11211 FM 2920, Tomball, TX 77375 has submitted a renewal application for their previously approved discharge plan permit for their Hobbs Tooling Oil and Gas Service Company, 5514 Carlsbad Highway, Hobbs N.M. 88240, located in Section 36, Township 18 South, Range 37 East, NMPM, Lea County, New Mexico. The facility provides cementing, acidizing, and fracturing services at oil and gas well sites. Approximately 100 gallons of residual tank clean out, 100 gallons of off-spec chemicals and several barrels (thousands of gallons) of corrosion inhibitor/Biocides/Paraffin's will be stored onsite within a bermed padded area. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 20 feet, with a total dissolved solids concentration of approximately 300 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

DEPARTMENT  
OIL CONSERVATION  
DIVISION**

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(GW-017) BJ Services CO, USA, 11211 FM 2920, Tomball, TX 77375 has submitted a renewal application for their previously approved discharge plan permit for their Hobbs Tooling Oil and Gas Service Company, 5514 Carlsbad Highway, Hobbs N.M. 88240, located in Section 36, Township 18 South, Range 37 East, NMPM, Lea County, New Mexico. The facility provides cementing, acidizing, and fracturing services at oil and gas well sites. Approximately 100 gallons of residual tank clean out, 100 gallons of off-spec chemicals and several barrels (thousands of gallons) of corrosion inhibitor/Biocides/Paraffin's will be stored onsite within a bermed padded area. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 20 feet, with a total dissolved solids concentration of approximately 300 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-281) Weather-

ford U.S., L.P., 515 Post Oak Boulevard, Suite 600, Houston, TX 77027, has submitted a renewal application for their previously approved discharge plan permit for their Fishing and Rental Oil and Gas Service Company, 850 S. Browning Parkway, Farmington, N.M., located in the SE/4 SW/4 of Section 13, Township 29 North, Range 13 West, NMPM, San Juan County, New Mexico. The facility provides down hole wire line service, fishing services and rentals of oilfield tools pipe and equipment for the exploration of oil and natural gas. Approximately 500 gallons of diesel, 6,600 gallons/month of wash water, 650 gallons/month of sump sludge and 200 gallons/month of used oil will be stored and generated on site. Fluids shall be placed in approved containers and properly stored within secondary containment. All waste streams shall be manifested accordingly. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 40 - 45 feet, with a total dissolved solids concentration of approximately 1000 - 2000 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

(GW-347) Weatherford U.S., L.P., 515 Post Oak Boulevard, Suite 600, Houston, TX 77027, has submitted a renewal application for their previously approved discharge plan permit for their Completion Gas and Oil Service Company, 514 East Animas Street, Farmington, N.M., located in the SE/4 NW/4 of Section 15, Township 29 North, Range 13 West, NMPM, San Juan County, New Mexico. The facility provides

downhole packers and other completion tools to the oil production industry. Approximately 120 gallons/day of wash water, 2 gallons/day of waste oil, 220 gallons/year of sump wash and a variety of paint cans and lubricant oils will be used, generated and stored on site. Fluids shall be placed in approved containers and properly stored within secondary containment. All waste streams shall be manifested accordingly. Groundwater most likely to be affected by a spill, leak or accidental discharge is at a depth of approximately 20 - 30 feet, with a total dissolved solids concentration of approximately 600 - 0900 mg/L. The discharge plan addresses how oilfield products and waste will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order to protect fresh water.

The NMOCD has determined that the application is administratively complete and has prepared a draft permit. The NMOCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, or may also be viewed at the NMOCD web site <http://www.emnrd.state.nm.us/ocd/>. Persons interested in obtaining a copy of the

application and draft permit may contact the NMOCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that NMOCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

**Re: Modification to Discharge Plan Permit GW-017  
BJ Services Company  
Hobbs Tools Facility  
Lea, New Mexico**

Dear Mr. Morrissette:

The New Mexico Oil Conservation Division (NMOCD) has reviewed your submitted application pertaining to the modification of your discharge plan, GW-017, for the Hobbs Tools facility located at 5514 Carlsbad Highway, Hobbs New Mexico, in Section 36, Township 18 South, Range 37 East, NMPM, Lea County, New Mexico. The application submittal and subsequent inquires have provided enough information to grant approval for the modification.

The NMOCD appreciates BJ Services willingness and effort to adhere to the WQCC rules and regulations via its discharge plan. This is a reminder that your discharge plan will expire on April 18<sup>th</sup>, 2008. Please submit the renewal application, in detail, including all modifications no later than 120 days before the expiration date.

If you have any questions, please do not hesitate to contact me at (505) 476-3492 or [leonard.lowe@state.nm.us](mailto:leonard.lowe@state.nm.us).

Sincerely,

A handwritten signature in black ink, appearing to read "Leonard Lowe".

Leonard Lowe  
Environmental Engineer

**Subject:** RE: GW-017 modification summary

Leonard - Here are the clarifications you asked for:

- Drum Storage Area A is the former acid dock and wash bay area converted into drum storage with concrete floors and a 3 ft wall surrounding the approximately 30 ft x 60 ft area. The former sump was filled in place with concrete and an access ramp was added with a 0.5 ft lip at this point. This area is a secondary storage area and is only utilized when Area B is full.
- Drum Storage Area B is an asphalt floor and concrete bermed area measuring 85.5 ft long x 67 ft wide x 0.5 ft deep.
- Drum Storage Area C & D, all drums in these areas are kept in prefabricated fiberglass containments that are one foot deep.
- Chemical Storage Building is a metal, three sided building with a floor and is 20 ft x 20 ft.
- No sumps are associated with any of these areas

Let me know if you need any more information.

Josh.

 Subject RE: GW-017 modification summary

10/18/2007 04:49 PM

Josh,

You need to expand on what exactly your did to modify your discharge plan.

According to your last submitted DP application 2003, Figure 1 to the Figure 2 (identified as Figure 1 in 03) there appears to be Drum storages added (Area B, C, and D), I need information on these buildings.

10/24/2007

How large are they? Do they have concrete floors? Do they have sumps? What secondary containments do they have?

Also, in you identified in the 2003 figure that there is an Inactive Washbay and Inactive Acid dock, and in the modification figure you identify these buildings as Drum Storage area A and chemical storage building. Please clarify these two areas for me. I can only assume that the two buildings are still inactive as stated in the 2003 figure and were changed to be storage areas. I need your input here. If so, were these buildings properly modified to ensure the safe storage of chemicals (sumps, containments, concrete floors, etc.) Please expand as well.

Thank you,

llowe

**Subject:** Re: GW-017 modification summary

There are two modifications to this facility:

1. Increase in chemicals stored onsite; and
2. Additional chemical storage areas created.

That summarizes the changes.

Leonard - Here are the TDS numbers for this site. Two separate wells were analyzed for TDS in 1995 as a part of closure activities and the results were 1,859 and 1,590 mg/L.

You can try the New Mexico state engineer's office.

Or find the nearest well and find out who owns it, they might have that information.

Subject RE: Questions GW - 017

Josh,

I got your corrected Application.

Yes, Total Dissolved Solids is needed for the application process.

I am sending you the corrected application, sorry I filled it out too fast.

By TDS I assume you mean Total Dissolved Solids. We don't have that information.

Subject Questions GW - 017

Josh,

I got your fax:

You note: North/4 East/4 Section 20 Township 18 S. Range 37 East

- What do you mean by "North/4 East/4", appears incorrect?
- Your previous applications note Section 36 you note Section 20. Which is correct?

What is the TDS of the ground water here?

llowe
