Attn: Mr. Williams J. Lemay

Dear Mr. Lemay:

Bass Enterprises Production Company respectfully requests an exception to the gas well location requirements of Rule 104, Section B of the State of New Mexico Oil Conservation Division Rules and Regulations for the subject well. The exception is necessary to recompleate the directionally drilled James Ranch Unit No. 15 to the Atoka Formation.

This well was directionally drilled in 1984 from a surface location 660' FSL and 100' FWL of Section 8, T23S, R31E to a bottom hole location 791' FSL and 1924' FEL of Section 7, T23S, R31E and was completed in the Morrow formation. Approval to drill the well was granted to Belco Development Company in Order R-7444. Bass proposes to recompleate the well to the Atoka Formation at an unorthodox bottomhole location 664' FSL and 1438' FEL of Section 7, T23S, R31E under the provisions of Rule 104, Section F, Paragraph I.

Attached is a list of operators which have been notified by registered mail of Bass' application. Also attached is a plot showing the ownership of all leases offsetting the S/2 of Section 7, T23S, R31E and showing the location of all wells completed on these leases. Please note that the proposed bottomhole location of the James Ranch Unit No. 15 is approximately 5140' from the nearest Atoka producer that is located on acreage not wholly owned by Bass.

If additional information is required, please contact Greg Spencer at (915) 683-2277.

Sincerely,

George A. Teer  
Division Production Manager
