Dear Mr. Le May:

We request administrative approval of an unorthodox location for our Santa Rosa 18 #2 Basin Fruitland Coal gas well, located 1875 FSL and 540 FWL, Section 18, T29N, R9W, San Juan County, New Mexico. This well staking is 250 feet too close to the Range line separating R9W and R10W.

The need for this unorthodox spacing arises from landowner preference of well location on the existing Pictured Cliffs well pad rather than our original staking which placed the well in the middle of his field. Considerable negotiations took place to establish this landowner preferred location.

Also enclosed with this application is a lease map showing the Fruitland Formation ownership of the leases surrounding this spacing unit. A well location and acreage dedication plat has also been provided for this well.

If you need any further information in this regard, please advise.

Yours truly,

Kevin H. McCord
Petroleum Engineer
