Attention: Mr. William J. LeMay - Director

Dear Mr. LeMay:

Chevron U.S.A. Inc. respectfully requests administrative approval for an unorthodox gas well location on the Mark Owen Well No. 6 and simultaneous dedication with the Mark Owen Wells Nos. 3 and 4.

Chevron U.S.A. is planning to recomplete the Mark Owen # 6 into the Blinebry Gas Pool. The well currently is completed in the Tubb Oil & Gas Pool. The location of the proposed recompletion is 554' FSL and 2086' FEL in Section 34, T21S, R37E, Lea County, New Mexico. This makes the well an unorthodox location per the Blinebry Gas Pool regulations.

The Mark Owen wells Nos 3 & 4 are dedicated to a standard 160 acre Gas Proration Unit which consists of the SE/4 of Section 34, T21S, R37E. This was approved July 31, 1990 under Administrative Order NSL-2838(SD). Well No. 3 is located 1980' FSL and 960' FEL (Unit I) Section 34, T21S, R37E. Well No. 4 is located 2068' FSL and 2068' FEL (Unit J) Section 34, T21S, R37E.

Well No. 6 was drilled in 1947 as Drinkard producer. The Blinebry was completed in 1954 and plugged in 1975. The Paddock and the Drinkard were added throughout the life of the well.

A copy of this administrative application is being provided to our offset operators via Certified Mail. Attached is a commercial map and a Form C-102 plat illustrating the proration unit acreage and well location. Also included is a copy of the letter sent to our offset operators and a copy of Administrative Order NSL-2838(SD).

If you have any questions, or if you require further information, please contact Lloyd Trautman at (915) 687-7152.

Sincerely,

L. V. Trautman  
Sr. Petroleum Engineer  
New Mexico Area

Attention: R. C. Anderson, District Manager

*Administrative Order NSL-2838(SD)*

Dear Mr. Anderson:

Reference is made to your application dated June 21, 1990 for a non-standard Blinebry gas well location for your existing Mark Owen Well No. 4 which was drilled in 1946 and completed in the Drinkard formation at a standard oil well location 2068 feet from the South and East lines (Unit J) of Section 34, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico. Our records indicate that in 1963 the Blinebry formation was tested in said wellbore and was completed as a Blinebry Oil well, however the Blinebry zone was shut-in from 1967 to 1988.

It is our understanding that after recent recompletion operation the GOR (Gas/Oil Ratio) exceeded 50,000 to 1 thereby changing the status of the Blinebry zone from an oil well to a gas well, which pursuant to the Special Rules and Regulations for the Blinebry Oil and Gas Pool, as promulgated by Division Order No. R-8170, as amended, is unorthodox.

Furthermore, it is our understanding that gas production from the subject well and from your Mark Owen Well No. 3 located 1980 feet from the South line and 960 feet from the East line (Unit I) of said Section 34 is to be simultaneously dedicated to the SE/4 of said Section 34 thereby forming a standard 160-acre gas spacing and proration unit for said pool.

By the authority granted me under the provisions of Rule 2(c) of said Order No. R-8170, as amended, the above-described unorthodox gas well location is hereby approved. Also, you are hereby authorized to simultaneously dedicated Blinebry Gas production from both the Mark Owen Well Nos. 3 and 4; furthermore, you are authorized to produce the allowable assigned the subject proration unit from both wells in any proportion.

*Administrative Order NSL-2838(SD)*

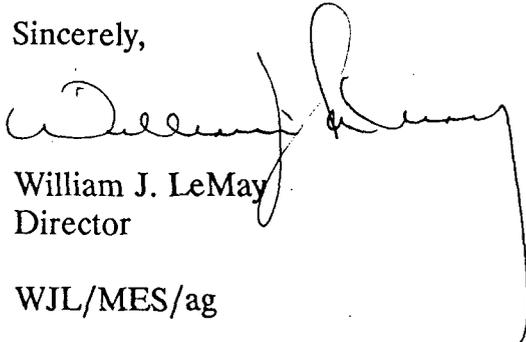

*Chevron USA, Inc.*

*July 31, 1990*

*Page 2*

By further order of the Division, previous Administrative Order Nos. NSP-725 (dated November 8, 1965), NSP-724 (dated November 8, 1965) and NSP-841 (dated July 12, 1971) are all superseded by this order.

Sincerely,

A handwritten signature in black ink, appearing to read "William J. LeMay". The signature is written in a cursive style with a long, sweeping tail that extends downwards and to the right.

William J. LeMay

cc: Oil Conservation Division - Hobbs

SUBJECT: DUAL COMPLETION (GAS-OIL)

March 19, 1954

THE APPLICATION OF GULF OIL CORPORATION  
FOR PERMISSION TO EFFECT DUAL COMPLETION  
OF ITS MARK OWEN WELL NO. 6, NE/4 SE/4  
SECTION 34, TOWNSHIP 21 SOUTH, RANGE 37 EAST,  
NMPM, LEA COUNTY, NEW MEXICO.

ORDER No. DC-89

ADMINISTRATIVE ORDER  
OF THE OIL CONSERVATION COMMISSION

Under the provisions of Order No. R-316, Rule 112-A, Gulf Oil Corporation made application to the New Mexico Oil Conservation Commission on March 8, 1954, for permission to dually complete its Mark Owen Well No. 6, NE/4 SE/4 Section 34, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico, and

The Secretary-Director Finds:

- (1) That application has been duly filed under the provisions of Sub-section 'c' of Rule 112-A of the Commission's Rules and Regulations;
- (2) That satisfactory information has been provided that all operators of offset acreage have been duly notified; and
- (3) That no objections have been received within the waiting period as prescribed by said rule.

IT IS THEREFORE ORDERED:

That the applicant herein, Gulf Oil Corporation, be and it hereby is authorized to dually complete its Mark Owen Well No. 6, NE/4 SE/4 Section 34, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico, in such manner as to permit production of gas from the Blinebry zone of the Blinebry Gas Pool through the casing-tubing annulus, and oil from the Drinkard zone of the Drinkard Gas Pool through the tubing, by proper perforations and the installation of a suitable packer;

PROVIDED HOWEVER, That subject well shall be completed and thereafter produced in such a manner that there will be no commingling within the well-bore, either within or outside the casing, of gas, oil and gas, or oil produced from either or both of the separate strata,

PROVIDED HOWEVER, That prior to the actual dual completion the operator shall make pressure tests of the casing to prove that no casing leaks have developed since the well was originally completed. In the event a casing leak is apparent the operator shall take appropriate steps to adequately repair the leak. The results of these tests shall be reported to the Commission on Form C-103.

PROVIDED FURTHER, That upon the actual dual completion of such subject well applicant shall submit to the District Office of the Commission at Hobbs, New Mexico, copies of Oil Conservation Commission Form C-103, Form C-104, Form C-110 and Form C-122 outlining the information required on those forms by existing Rules and Regulations, and two copies of the electric log of the well, if available.

DC-89

PROVIDED FURTHER, That said subject well for dual completion and production shall be equipped in such a way that reservoir pressures may be determined separately for each of the two specified strata, and further, be equipped with all necessary connections required to permit recording meters to be installed and used, at any time, as may be required by the Commission or its representatives, in order that natural gas, oil or oil and gas from each separate stratum may be accurately measured and the gas-oil ratio thereof determined, and

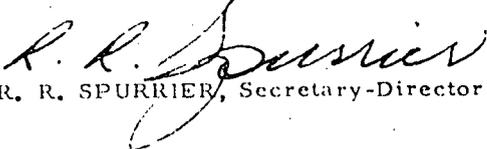

PROVIDED FURTHER, That the operator-applicant shall make any and all tests, including segregation tests, but not excluding other tests and/or determinations at any convenient time and in such manner as deemed necessary by the Commission; the original and all subsequent tests shall be witnessed by representatives of the Commission and by representatives of offset operators, if any there be, at their election, and the results of each test properly attested to by the applicant herein and all witnesses, and shall be filed with the Commission within ten days after completion of such test, and

PROVIDED FURTHER, That upon the actual dual completion of such subject well, applicant shall submit to the Commission a diagrammatic sketch of the mechanical installation which was actually used to complete and produce the seal between the strata, and a special report of production, gas-oil and reservoir pressure determination of each producing zone or stratum immediately following completion.

IT IS FURTHER ORDERED, That jurisdiction of this cause is hereby retained by the Commission for such further order or orders as may seem necessary or convenient for the prevention of waste and/or protection of correlative rights; upon failure of applicant to comply with any requirement of this order after proper notice and hearing, the Commission may terminate the authority hereby granted and require applicant or its successors and assigns to limit its activities to regular single-zone production in the interests of conservation.

APPROVED at Santa Fe, New Mexico, on this 19th day of March, 1954.

Re: Application to Dually Complete  
Gulf Oil Corporation Mark Owens  
No. 6, Drinkard Pool, Lea County,  
New Mexico

Gentlemen:

By this letter of application Gulf Oil Corporation wishes to state the following:

(a) That Gulf Oil Corporation Mark Owen No. 6, located in the NE/4 SE/4 of Section 34, T-21-S, R-37-E, was completed November 20, 1947, at a total depth of 6552'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation Mark Owen Lease together with the location of all offset wells.

(b) That subject well has 7" casing set at 6475' and cemented with 700 sacks of cement. The well is an oil well producing from the open hole interval from 6475-6552' in the Drinkard Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

(1) Perforate the 7" casing within the approximate interval of 5510-5700' in the Blinbry Gas Pool.

(2) Set production type packer below these perforations at approximately 5800' to separate the two pay zones.

(3) Produce the Drinkard Pool oil through the tubing and the Blinbry gas through the tubing-casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Blinbry and oil from the Drinkard is in the interest of conservation and the protection of correlative rights.

(e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.

301-0768

New Mexico Oil Conservation Commission  
March 3, 1951  
Page 2

(f) That the manner and method of the proposed dual completion is mechanically feasible and practical.

(g) That by copy of this letter of application, all offset operators are notified of the proposed dual completion.

Therefore, Gulf Oil Corporation requests that the Oil Conservation Commission grant permission to the applicant to dually complete the subject well as proposed in this application.

Respectfully submitted,

  
C. F. TAYLOR  
Area Production Superintendent
