By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

On Sunday December 2, 2007 at 0800 hrs a leak was discovered coming from a 6" dump line on EVGSAU CTB East FWKO. Amount spilled was 11 bbls of crude oil. The spill was contained inside the dike at the Battery. The MSO placed a clamp on the line and called a vacuum truck to pick up free liquids. 10 bbls of crude oil was recovered. Remediation activities will commence upon abandonment of facility due to the danger of working around injection headers and the fire loop system at this facility.

Describe Area Affected and Cleanup Action Taken.*

The spill was contained inside the dike at the Battery. The MSO clamped the line and called a vacuum truck to pick up free liquids. 10 bbls of crude oil was recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
