Application for Unorthodox Location
Pollock Com E-1 Well
860' FSL, 805' FEL, Section 28-T29N-R10W
Basin Fruitland Coal Pool
San Juan County, New Mexico

Amoco Production Company hereby requests administrative approval for an unorthodox well location in the Basin Fruitland Coal Pool. Amoco plans to recompleate the existing Pollock Com E-1 Well from the Gallup and Mesaverde formations to the Fruitland Coal formation. This well is currently uneconomic and would be abandoned if not utilized for recompletion. The location of the well is 860' FSL and 805' FEL of Section 28-T29N-R10W. Although this location is orthodox for the Armenta Gallup and Blanco Mesaverde pools, it is unorthodox in the Basin Fruitland Coal Pool due to the required NE-SW pattern. All existing wells in the orthodox location are currently economic producers and are not candidates for recompletion.

A copy of this application will be submitted to the offset operators by certified mail with a request that they furnish your Santa Fe office with a Waiver of Objection, and return one copy to this office. Attached is a plat showing the location of the well and offset operators and a plat showing all wells drilled in the section.

Sincerely,

A handwritten signature in cursive script that reads "J. W. Hawkins".
