If a Watercourse was Impacted, Describe Fully.\*  
**N/A**

Describe Cause of Problem and Remedial Action Taken.\*  
**On Friday December 7, 2007 at 0750 the Tank at Philmex #6 was discovered to be overflowing due to the drive belts on the injection pump. Amount spilled was 22 bbls of oil. The spill was not contained and affected approximately 4000 sq/ft of pad. The MSO stopped production into the tank and called a vacuum truck to pick up the free liquids. 15 bbls of Crude Oil was recovered.**

Describe Area Affected and Cleanup Action Taken.\*  
**The spill was not contained and affected approximately 4000 sq/ft of pad. The MSO stopped production into the tank and called a vacuum truck to pick up the free liquids. 15 bbls of Crude Oil was recovered. The site will be delineated and remediated in accordance with NMOCD guidelines.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
