RE: Application for Unorthodox Location

Gentlemen:

Louis Dreyfuss Natural Gas Corp. hereby requests approval of an unorthodox drilling location for the MKL 14-8, 390' FSL & 735' FWL, Sec. 8, T 26N, R 7 W, Rio Arriba County, New Mexico. This will be a methane gas well drilled to a depth of 2300'.

The location originally proposed for this well was 826' FSL & 856' FWL of the same section but was relocated due to topographical reasons. The original location was near the edge of a wash (as shown on the attached topographical map). In order to build a site large enough to drill safely the location was moved approximately 300' to the south.

Also attached are a description of the lease, Federal lease number SF 079162, and a plat showing ownership of offsetting leases with completed wells.

Owners of offsetting leases have been notified of this application by certified mail. Offsetting lease holders are:
